Frames of Minds Eelco F. M. Wijdicks, 2024 As a medium that aims to connect people through the communication and interpretation of experiences cinema is uniquely positioned to showcase cultural misunderstandings around issues of mental health *Frames of Minds* traces a history of psychiatry in film concentrating on the major paradigm shifts in neuropsychiatry over the last century Oftentimes representations of psychiatry

mental illness and psychotic breakdown are reduced to tropes and used by filmmakers as a tool for plot progression Conversely films can be used as an avenue to voice common concerns about the missteps of psychiatry including overdiagnosis and mistreatment Dr Eelco Wijdicks provides fresh insights into the minds of filmmakers and how they creatively tackle this complex topic How do filmmakers use psychiatry and what do they want us to see What is their frame of mind psychoanalytically biologically sociologically anthropologically Were they influenced by their own prejudices about the origins of mental illness How does this influence the direction of their films Examining the history of film alongside developments in neuropsychiatry Frames of Minds uncovers a cinematic language of psychiatry By taking chances to portray mental illness filmmakers aim to achieve a sense of reality and provide catharsis for viewers through the act of dramatization Ultimately the history of psychiatry in film is a history of the public perception of medicine and the ways psychiatry is understood by directors writers actors and audiences
