(U.S.),1982 The Consciousness' Drive Charles Cole,2018-09-18 What is the uniquely human factor in finding and using information to produce new knowledge Is there an underlying aspect of our thinking that cannot be imitated by the AI equipped machines that will increasingly dominate our lives This book answers these questions and tells us about our consciousness its drive or intention in seeking information in the world around us and how we are able to construct new knowledge from this information The book is divided into three parts each with an introduction and a conclusion that relate the theories and models presented to the real world experience of someone using a search engine First Part I defines the exceptionality of human consciousness and its need for new information and how uniquely among all other species we frame our interactions with the world Part II then investigates the problem of finding our real information need during information searches and how our exceptional ability to frame our interactions with the world blocks us from finding the information we really need Lastly Part III details the solution to this framing problem and its operational implications for search engine design for everyone whose objective is the production of new knowledge In this book Charles Cole deliberately writes in a conversational style for a broader readership keeping references to research material to the bare minimum Replicating the structure of a detective novel he builds his arguments towards a climax at the end of the book For our video game video on demand times he has visualized the ideas that form the book s thesis in over 90 original diagrams And above all he establishes a link between information need and knowledge production in evolutionary psychology and thus bases his arguments in our origins as a species how we humans naturally think and how we naturally search for new information because our consciousness drives us to need it **Current Catalog** National Library of Medicine (U.S.),1982 First multi year cumulation covers six years 1965 70 **Library of Congress Catalog** Library of Congress,1974-07 Beginning with 1953 entries for Motion pictures and filmstrips Music and phonorecords form separate parts of the Library of Congress catalogue Entries for Maps and atlases were issued separately 1953 1955 **Human Aspects of IT for the Aged Population.
