Endicott,2006 This text is a debate style reader designed to introduce students to controversies in cultural anthropology The readings which represent the arguments of leading anthropologists and educators reflect a variety of viewpoints and have been selected for their liveliness and substance their relevance to the topics included in college level study of cultural anthropology and because of their value in a debate framework Back cover **Whitaker's Books in Print** ,1998 Cultural Anthropology Serena Nanda,Richard L. Warms,2019-01-09 Cultural Anthropology integrates critical thinking explores rich ethnographies and prompts students to

skillfully explore and study today's world. Readers will better understand social structures by examining themselves, their culture and cultures from all over the globe. Serena Nanda and Richard L. Warms show how the analytical understandings and tools derived from over a century of systematically collecting data and thinking about culture can help students analyze, understand and act effectively in the world. With a practical emphasis on areas such as medicine, forensics, development and advocacy, this book takes an applied approach to anthropology. The authors cover a broad range of theories, both historical and contemporary, without any insistence on any particular approach and balance it with applied contemporary real-world global issues. The new Twelfth Edition includes a wealth of new examples and over 500 references that update ethnographic examples, statistical information and theoretical approaches.

Nigerian Cultural History and Challenges of Postcolonial Development Aderemi Suleiman Ajala, Samuel Oluwole Ogundele, 2023-04-05. An inspiring editorial analysis and interpretation of aspects of Nigerian history, culture and politics from mankind's archaeological past to ethnographic present, this book contextualises cultural history as an instrument of sustainable development in postcolonial Nigeria. Nigeria's rich cultural history defines its physical environment, cultural diversities, early industrial technology and even its various challenges of development. Yet little is achieved in engaging cultural history as cultural experience for the country's development. The gains of cultural history as a mirror of the past and inspiration for development is ignored. This difficulty in harnessing the potential for development in Nigeria found in the country's cultural history leaves us vulnerable to repeating past mistakes. The book is accessible and aimed at giving the readers a unique and expansive understanding of history, cultural knowledge and their applications in Nigerian postcolonial development agendas. This makes the book essential for scholars of anthropology, archaeology, history, linguistics, sociology, political science and geography as well as policy makers.

Early Life Thom Holmes, 2008. Discusses the Cambrian era in Earth's history when the first forms of life appeared and began to flourish and evolve.

Mobility and Migration in Indigenous Amazonia Miguel N. Alexiades, 2009. Contrary to ingrained academic and public assumptions wherein indigenous lowland South American societies are viewed as the product of historical emplacement and spatial stasis, there is widespread evidence to suggest that migration and displacement have been the norm and not the exception. This original and thought-provoking collection of case studies examines some of the ways in which migration and the concomitant processes of ecological and social change have shaped and continue to shape human-environment relations in Amazonia. Drawing on a wide range of historical time frames from pre-conquest times to the present and ethnographic contexts, different chapters examine the complex and important links between migration and the classification, management and domestication of plants and landscapes as well as the incorporation and transformation of environmental knowledge, practices, ideologies and identities.

Homo Novus - A Human Without Illusions Ulrich J. Frey, Charlotte Störmer, Kai P. Willführ, 2010-08-24. Converging evidence from disciplines including sociobiology, evolutionary psychology and human biology forces us to adopt a new idea of what it means to be a human. As cherished concepts such as

free will naïve realism humans as creation's crowning glory fall and our moral roots in ape group dynamics become clearer we have to take leave of many concepts that have been central to defining our humanness What emerges is a new human the homo novus a human being without illusions Leading authors from many different fields explore these issues by addressing a range of illusions and providing evidence for the need despite considerable reluctance to relinquish some of our most cherished ideas about ourselves
