which land deals are being made the implications for agrarian structure rural livelihoods and food security and the historical context for changing land uses The case studies reveal that these land grabs may resonate with even resurrect forms of production associated with the colonial and early independence eras Based on interviews with the investors government authorities workers outgrowers and smallholder farmers in Nigeria Ghana Kenya Tanzania Malawi Mozambique and the Congo the book depicts the striking diversity of such deals

Parks in Transition Brian Child, 2004 Parks face intense pressure from both environmental and developmental perspectives to conserve biodiversity and provide economic opportunities for rural communities These imperatives are often in conflict while potential solutions may be subject to theoretical and practical disagreement and complicated by pressing economic political and cultural considerations Parks in Transition collects the work of the most distinguished scholars and practitioners in this field drawing on insight from over 50 case studies and synthesizing them into lessons to guide park management in transitional economies where the challenges of poverty and governance can be severe The central message of the book is that parks are common property regimes that are supposed to serve society It analyses and sheds light on the crucial questions arising from this perspective If parks are set aside to serve poor people should conservation demands over rule demands for jobs and economic growth Or will deliberately using parks as bridgeheads for better land use and engines for rural development produce more and better conservation The issue that arises at all levels is that of accountability including the problematic linkages between park authorities and political systems and the question of how to measure park performance This book provides vital new insights for park management regarding the relationship between conservation and commercialization performance management new systems of governance and management and linkages between parks landscape and the land use economy

The Changing Face of Land and Conservation in Post-colonial Africa George Barrett, Shirley Brooks, Jenny Josefsson, Nqobile Zulu, 2016-03-22 The year 2013 marked the 100th anniversary of the 1913 Land Act in South Africa which legalised the violent dispossession and alienation of the African majority from the land It is common cause that the alienation of land for conservation purposes introduced to Africa under colonial rule has continued more or less uninterrupted until today However while nature conservation practices inevitably raise challenging questions relating to land and land use there has thus far been little concentrated effort to bring together scholars working on the land question particularly around issues of land tenure with those whose work focuses on questions of nature construction and the social impacts of conservation in an African context Compiled from research presented at a ground breaking interdisciplinary conference held at Rhodes University in Grahamstown South Africa in 2012 the chapters in this book made their first appearance in a special issue of the Journal of Contemporary African Studies JCAS in July 2013 The book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post colonial Africa into conversation with the well trodden territory of land use and contested land issues on the continent Anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences the book provides fresh insights into the complex relationship between land and conservation in contemporary Africa

Nature Conservation in Southern Africa ,2018-11-26 Nature conservation in southern Africa has always been characterised by an interplay between Capital specific understandings of Morality and forms of Militarism that are all dependent upon the shared subservience and marginalization of animals and certain groups of people in society Although the subjectivity of people has been rendered visible in earlier publications on histories of conservation in southern Africa the subjectivity of animals is hardly ever seriously considered or explicitly dealt with In this edited volume the subjectivity and sentience of animals is explicitly included The contributors argue that the shared human and animal marginalisation and agency in nature conservation in southern Africa and beyond could and should be further explored under the label of sentient conservation Contributors are Malcolm Draper Vupenyu Dzingirai Jan Bart Gewald Michael Glover Paul Hebinck Tariro Kamuti Lindiwe Mangwanya Albert Manhamo Dhoya Snijders Marja Spierenburg Sandra Swart Harry Wels **Human**
