Miller,2001-01-01 This fascinating text and picture tribute documents both interiors and exteriors of majestic British ships such as the Viceroy of India the Orion Queen Mary Queen Elizabeth Windsor Castle Pacific Princess Royal Princess Crown Princess and Aurora Over 200 rare black and white illustrations provide views of the ships at sea and in port The Last Blue Water Liners William H. Miller,1986-01-01 Describes ocean liners of the past looks at their routes histories and accommodations and explains the reasons for the decline of ocean travel **Doomed Ships** William H., Jr. Miller,2012-06-29 Nearly 200 photographs many from private collections highlight tales of some of the vessels whose pleasure cruises ended in catastrophe the Morro Castle Normandie Andrea Doria Europa and many others Extractives, Manufacturing, and Services David O. Whitten,1997-04-22 The second volume in the Handbook of American Business History series this book offers concise histories of extractive manufacturing and service industries as well as extensive bibliographic essays pointing to the leading sources on each industry and bibliographic checklists Supplementing other bibliographic materials in business history this volume provides researchers with a much needed path through the vast array of material available in the library and on the Internet Indicating which resources to check and which to bypass the book is a guide to a sometimes overwhelming amount of information Each of the book s chapters provides a concise industry history beginning with the industry s rise to importance in the U S and continuing to the present The bibliographic essays provide a narrative outline of the leading sources published or made available in archives libraries or museum collections since 1971 when Lovett s American Economic and Business History Information Sources was published Each discussion concludes with a bibliographic checklist of the titles mentioned in the essay as well as other titles In a rapidly expanding information society researchers teachers and students may be easily overwhelmed by the exhaustive material available in print and electronically What is useful and what can be ignored is a strategic question and few know where to begin This book provides a guide **A Postcard History of the Passenger Liner** Christopher Deakes,2023-10-01 From around 1880 for almost a hundred years shipowners commissioned a wealth of paintings that depicted their magnificent liners as well as the routes they travelled their exotic destinations and life onboard These paintings rich in imagination and atmosphere appeared on postcards and posters of the day and were used to advertise the companies and their ships and so was born a whole genre that produced tens of thousands of paintings which formed a wonderful record of the great era of the passenger liner In 1900 there were over thirty shipping companies operating passenger liners across the North Atlantic Other oceans were similarly served But now with just a few exceptions the companies and their liners have disappeared along with the art they once inspired Little remains to recall this aspect of our

maritime past except the postcards and they tell an evocative story of the vanished world of elegant ships and leisurely travel of social and political times much changed by the history of the past century Here brought vividly to life in more than 500 colourful postcards are the ships on which so many of our predecessors sailed as emigrants soldiers administrators or simply as tourists in days long past These cards which are now highly collectable show how steamships developed over the years but they are also a fine tribute to the artists who painted them This volume also includes a glossary of some 170 illustrators which forms an important reference section and advice on collecting

Transition in Power Peter J. Hugill, 2018-08-15

Hegemonic transitions are never clear and they usually emerge from a period of multi polarity in the world system Two types of state tend to contend for power trading states and territorial states although most states are never pure and tend to contain within them multiple polities with different agendas This book describes the hegemonic transition between two major trading states Britain and America British decline began in the late Victorian era but the transition to American power was slow and other states also sought hegemony Transitions between trading states focus on economic struggle though struggles between trading and territorial states and between territorial states are marked by armed conflict In 1919 President Woodrow Wilson saw three arenas of competition developing between Britain and America in international transportation international communication and petroleum But Britain was challenged economically by America as early as 1861 via the Morrill Tariff her economic hegemony was gone by the 1880s and she was defeated by 1947 From the 1880s on both America and Germany sought to replace Britain as hegemonic power not only through their implementation of protectionist economic policies but also through the adoption of revised versions of the world economy through new technologies and in the case of Germany military power Britain struggled to stay in place Britain's world economy was that of a pure trading state Maritime trade in organic materials was organized through global capitalism and control over submarine cable telecommunications rather than territorial possession America's rise was greatly helped by being a capitalist power in possession of a secure territorial base in the mid section of the North American continent but America suffered from multiple polities competing for power with the South particularly problematic Germany developed a radically new world economy that synthesized resources using organic chemistry German science and technology began to diffuse to American corporate laboratories before World War One After that war diffusion to American laboratories and universities was massive and helped secure American hegemony

The Royal Navy, China Station: 1864 - 1941 Jonathan

Parkinson, 2018-02-20 A definitive history of the Royal Navy's China Station In the The Navy List for April 1864 the China

Station was first shown as a separate Royal Navy Station It remained as such until the outbreak of the Pacific War in

December 1941 which was to signal the end of that era In addition to a precis of the lives and naval careers of each of the

Commanders in Chief of the China Station this volume also gives relevant information outlining something of the concurrent

internal affairs of China and Japan Both are very different but sad tales the former in decline towards the end of the Manchu Ching dynasty and then into the chaotic 1920 s and 1930 s and the latter increasingly adopting a militaristic attitude which was to result in their disaster of the Pacific War of 1941 1945 As a reminder of these days long gone are interwoven brief references to the British Consular Service This is especially relevant for China and for a shorter period for Japan during that era of extraterritoriality Mention is also made of the British Colonial Service with whom necessarily the Navy worked very closely In addition being one important reason for it all frequent references are made to a few British shipping and trading interests together with those of some other nations All of these areas are linked together to give a definitive history of this very important Royal Navy Station
