From Sister X and the Victims of Foul Play Carlene Hatcher Polite, 1978 **Sister X and the Victims of Foul Play** ... Carlene Hatcher Polite, 1975-01-01 *The Lever of Riches* Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **Rape and Representation** Lynn A. Higgins, 1993-07-15 Rape does not have to happen The fact that it does and in the United States a rape is reported every six minutes indicates that we live in a rape prone culture where rape or the threat of rape functions as a tool for enforcing sexual difference and hierarchy Rape and Representation explores how cultural forms construct and reenforce social attitudes and behaviors that perpetuate sexual violence The essays proceed from the observation that literature not only reflects but also contributes to what a society believes about itself Fourteen essays by authors in the fields of English American and African American German African Brazilian Classical and French literatures and film present a wide range of texts from different historical periods and cultures Contributors demythologize patriarchal representation in literature and art in order to show how it makes rape seem natural

From Harlem to Paris Michel Fabre, 1991 This academic study uses accounts from more than 60 African American writers Countee Cullen James Baldwin Chester Himes et al to explain why they were more readily accepted socially in Paris than in America Fabre The Unfinished Quest of Richard Wright shows that French black American affinity started in pre Civil War New Orleans and not as the title suggests in Harlem when illegitimate mulattos with inheritances from French slave owners sent their children to Paris to be educated The book concludes that acceptance and appreciation of black Americans were based largely of French distaste both for white Americans whom the French found egotistical and for black Africans with whom the French had a bitter mutual colonial history

Signs and Cities Madhu Dubey,2007-11-01 Signs and Cities is the first book to consider what it means to speak of a postmodern moment in African American literature Dubey argues that for African American studies postmodernity best names a period beginning in the early 1970s marked by acute disenchantment with the promises of urban modernity and of print literacy Dubey shows how black novelists from the last three decades have reconsidered the modern urban legacy and thus articulated a distinctly African American strain of

postmodernism She argues that novelists such as Octavia Butler Samuel Delany Toni Morrison Gloria Naylor Ishmael Reed Sapphire and John Edgar Wideman probe the disillusionment of urban modernity through repeated recourse to tropes of the book and scenes of reading and writing Ultimately she demonstrates that these writers view the book with profound ambivalence construing it as an urban medium that cannot recapture the face to face communities assumed by oral and folk forms of expression **Jet** ,1969-09-11 The weekly source of African American political and entertainment news
