## Slow Burn:

**Slow Burn** Anne Marsh, 2013 Smoke jumper Evan Donovan works a suspicious brushfire during which he meets photographer Faye Duncan who may have unwittingly taken a picture of an arsonist setting the blaze Slow Burn Pamela Britton, 2012-11-15 And the winner is Dana Johnson What Turns out Dana's friend secretly entered her in the contest to win a dinner date with NASCAR driver Braden James Burned by her former fiancé Dana isn't exactly eager to be swept off her feet by someone who'll disappear after dessert She tells Braden he's off the hook but he says they're on His sponsor a matchmaking Web site is counting on him And he's counting on her to swoon on cue for the cameras Not too difficult Braden is much more than just a gorgeous hotshot A foster care kid who's seen his share of hard knocks he's driven head on through heartache and triumph But when the last flashbulb pops will their slow burn ignite into a very real romance Slow Burn R. Jisung Park, 2025-07-29 How the subtle but significant consequences of a hotter planet have already begun from lower test scores to higher crime rates and how we might tackle them today It's hard not to feel anxious about the problem of climate change especially if we think of it as an impending planetary catastrophe In *Slow Burn* R. Jisung Park encourages us to view climate change through a different lens one that focuses less on the possibility of mass climate extinction in a theoretical future and more on the everyday implications of climate change here and now Drawing on a wealth of new data and cutting edge economics Park shows how climate change headlines often miss some of the most important costs When wildfires blaze what happens to people downwind of the smoke When natural disasters destroy buildings and bridges what happens to educational outcomes Park explains how climate change operates as the silent accumulation of a thousand tiny conflagrations imperceptibly elevated health risks spread across billions of people pennies off the dollar of productivity fewer opportunities for upward mobility By investigating how the physical phenomenon of climate change interacts with social and economic institutions Park illustrates how climate change already affects everyone and may act as an amplifier of inequality Wealthier households and corporations may adapt quickly but without targeted interventions less advantaged communities may not Viewing climate change as a slow and unequal burn comes with an important silver lining It puts dollars and cents behind the case for aggressive emissions cuts and helps identify concrete steps that can be taken to better manage its adverse effects We can begin to overcome our climate anxiety Park shows us when we begin to tackle these problems locally
