Slow Death And Other Oklahoma Murders:

Slow Death. . . and Other Oklahoma Murders Mary Ellen Cooper, 2003-06 Carol Ann Heller thought she'd found the man of her dreams when she'd married Dennis Heller but less than a year later her health was shattered and she lay dying of a mysterious illness Only a sharp ER doctor suspected the truth too late to save her Then two tenacious investigators pursued the killer who condemned her to a SLOW DEATH And other stories of Oklahoma murders **The Slow Death of the Death Penalty** Todd C. Peppers, Jamie Almallen, Mary Welek Atwell, 2025-07-01 Why the death penalty is in decline across the United States Across the country the death penalty is dying Twenty two states have abandoned state sanctioned executions including nine in the last fifteen years Of the twenty eight states that still have the death penalty eight have not had an execution in over a decade And public support for the death penalty has declined from 80% of the surveyed population in the early 1990s to approximately 50% today As the death penalty slowly withers away Todd C Peppers Jamie Almallen and Mary Welek Atwell bring together a number of distinguished death penalty scholars activists and attorneys to take an accounting of the damage inflicted by the machinery of death Contributors to the book point to a range of different pathologies which have caused politicians and voters to turn against capital punishment from unacceptable rates of false convictions and racially motivated prosecutions to a clemency process poisoned by political factors Essay topics include various dimensions of the death penalty including racial and gender bias economic costs the conviction of juveniles the mentally ill and the factually innocent Supreme Court decisions and the failure of the death penalty to serve as a deterrent against crime This important volume is an up to date accounting of the current state and as the contributors argue the future demise of the death penalty

Secrets of the Killing State Corinna Barrett Lain, 2025-04-22 Lethal injection is nothing like what you think These are the Secrets of the Killing State This is its untold story a story of incompetence law breaking lies and malfeasance all covered by a heavy layer of secrecy **Germs, Toxins, and Terror** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Technology, Terrorism, and Government Information, 2002 Killing Times David Wills, 2019-03-05 Killing Times begins with the deceptively simple observation made by Jacques Derrida in his seminars on the topic that the death penalty mechanically interrupts mortal time by preempting the typical mortal experience of not knowing at what precise moment we will die Through a broader examination of what constitutes mortal temporality David Wills proposes that the so called machinery of death summoned by the death penalty works by exploiting or perverting the machinery of time that is already attached to human existence Time Wills argues functions for us in general as a prosthetic technology but the application of the death penalty represents a new level of prosthetic intervention into what constitutes the human Killing Times traces the logic of the death penalty across a range of sites Starting with the legal cases whereby American courts have struggled to articulate what methods of execution constitute cruel and unusual punishment Wills goes on to show the ways that technologies of death have themselves evolved in conjunction with ideas of cruelty and instantaneity from the

development of the guillotine and the trap door for hanging through the firing squad and the electric chair through today's controversies surrounding lethal injection. Responding to the legal system's repeated recourse to storytelling, prosecutors and politicians' endless recounting of the horrors of crimes, Wills gives a careful eye to the narrative even fictive spaces that surround crime and punishment. Many of the controversies surrounding capital punishment, Wills argues, revolve around the complex temporality of the death penalty: how it works in conjunction with forms of suspension or extension of time; how its seeming correlation between egregious crime and painless execution is complicated by a number of different discourses. By pinpointing the temporal technology that marks the death penalty, Wills is able to show capital punishment's expansive reach, tracing the ways it has come to govern not only executions within the judicial system but also the opposed but linked categories of the suicide bombing and drone warfare. In discussing the temporal technology of death, Wills elaborates the workings both of the terrorist who produces a simultaneity of crime and punishment that bypasses judicial process and of the security state in whose remote control killings the time-space coordinates of justice are compressed and at the same time disappear into the black hole of secrecy. Grounded in a deep ethical and political commitment to death penalty abolition, Wills's engaging and powerfully argued book pushes the question of capital punishment beyond the confines of legal argument to show how the technology of capital punishment defines and appropriates the instant of death and reconfigures the whole of human mortality.

The Radiant Lives of Animals Linda Hogan, 2020-10-13 Winner of the Inaugural 2022 National Book Foundation Science Literature Award. From a celebrated Chickasaw writer, a spiritual meditation in prose and poetry on our relationship to the animal world in an illustrated gift package. Concerned that human lives and the natural world are too often defined by people who are separated from the land and its inhabitants, Indigenous writer and environmentalist Linda Hogan depicts her own intense relationships with animals as an example we all can follow to heal our souls and reconnect with the spirit of the world. From her modest forest home in Colorado and venturing throughout the region, especially to her beloved Oklahoma, she introduces us to horses, packrats, snakes, mountain lions, elks, wolves, bees, and so many others whose presence has changed her life. In this illuminating collection of essays and poems lightly sprinkled with elegant drawings, Hogan draws on many Native nations' ancient stories and spiritual traditions to show us that the soul exists in those delicate places where the natural world extends into human consciousness: in the mist of morning, the grass that grew a little through the night, the first warmth of this morning's sunlight. Altogether, this beautifully packaged gift is a reverential reminder for all of us to witness and appreciate the radiant lives of animals.

The Wild Frontier William M. Osborn, 2009-11-18 The real story of the ordeal experienced by both settlers and Indians during the Europeans' great migration west across America from the colonies to California has been almost completely eliminated from the histories we now read. In truth, it was a horrifying and appalling experience, nothing like it had ever happened anywhere else in the world. In *The Wild Frontier*, William M. Osborn discusses the changing settler attitude toward the Indians over several centuries as

well as Indian and settler characteristics the Indian love of warfare for instance more than 400 inter tribal wars were fought even after the threatening settlers arrived and the settlers irresistible desire for the land occupied by the Indians The atrocities described in *The Wild Frontier* led to the death of more than 9 000 settlers and 7 000 Indians Most of these events were not only horrible but bizarre Notoriously the British use of Indians to terrorize the settlers during the American Revolution left bitter feelings which in turn contributed to atrocious conduct on the part of the settlers Osborn also discusses other controversial subjects such as the treaties with the Indians matters relating to the occupation of land the major part disease played in the war and the statements by both settlers and Indians each arguing for the extermination of the other He details the disgraceful American government policy toward the Indians which continues even today and speculates about the uncertain future of the Indians themselves Thousands of eyewitness accounts are the raw material of *The Wild Frontier* in which we learn that many Indians tortured and killed prisoners and some even engaged in cannibalism and that though numerous settlers came to the New World for religious reasons or to escape English oppression many others were convicted of crimes and came to avoid being hanged *The Wild Frontier* tells a story that helps us understand our history and how as the settlers moved west they often brutally expelled the Indians by force while themselves suffering torture and kidnapping
