Regional Development Planning and Management of Urbanization United Nations Centre for Human Settlements,1997 *India Working* Barbara Harriss-White,2003 By drawing on her extensive fieldwork in India and on the adjacent theoretical literature Barbara Harriss White describes the working of the Indian economy through its most important social structures of accumulation Successive chapters explore a range of topics including labour capital the state gender religious plurality caste and space Despite the complexity of the subject the book is vivid and compelling The author s intimate knowledge of the country enables the reader to experience the Indian local scene and to engage with the precariousness of daily life Her conclusion challenges the prevailing notion that liberalisation releases the economy from political interference and leads to a postscript on the economic base for fascism in India This is an intelligent book first published in 2002 by a distinguished scholar for students of economics as well as for those studying the region

Society Patrick M. Boyle, 2018-10-26 First published in 1999 this study of the politics of education in Cameroon the Congo and Kenya presents arresting empirical evidence that urban elites exiting public sector educational systems they have dominated in favour of private school networks of their own creation Seeking to enhance their offspring's chances for survival and even domination in a world of scarce resources and limited opportunities for employment elites see private schools as tools to shape newly emerging civil societies in Africa in their own image From a theoretical perspective the fresh evidence presented here shows that schooling has once again become a major social force influencing the balance of state and society in modern Africa Re-examining an older political tradition of class analysis and integrating it into more recent civil society perspectives the author shows that the abandonment of the unreliable education services of dysfunctional African states in favour of private schools has profound consequences for class articulation in societies dividing once again according to educational opportunities **Urban and Peri-urban Agriculture in Africa** David Grossman, Leo M. van den

Thailand the authors explore how settlements and livelihoods are being transformed as long term inhabitants and recent migrants embrace new economic activities many of which are linked to global markets The book is structured around the concept of frontier which is conceptualized as being a dynamic space where the forces of economic demographic and social change are brought to bear The study sites include agricultural frontiers coffee cocoa pineapples and fresh fruit handicraft and manufacturing frontiers and mining frontiers gold and diamonds In all of the cases global value chain dynamics have played a pivotal role in shaping local livelihoods Some settlements are developing into new urban centres whilst others are suffering from a boom and bust experience due to the unreliability of export markets The similarities and differences between the frontier settlements are drawn out by comparing frontiers of similar types and by highlighting the theoretical and policy implications of the findings from all the frontier types The originality of the book lies in its combination of conceptual clarity methodological coherence and empirical richness By combining detailed empirical findings with theoretical insight from debates on livelihoods global value chains mobility patterns settlement dynamics and rural urban relations the book sheds new light on these issues within an overall framework of development trajectories in Africa and Asia Given scholars and international agencies current interest in the spatial dimensions of economic development this contribution is particularly timely with its fresh geographical approach to development issues this book is a pertinent and authoritative read for anyone researching or learning in the field of development

Circular Migration in Zimbabwe & Contemporary Sub-Saharan Africa Deborah Helen Potts, 2010 The World Bank insists that the urban share of sub-Saharan Africa's population is rapidly increasing this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change Circular migration whereby rural migrants do not remain permanently in town has particular significance in the academic literature on development and urbanization in Africa often having negative connotations in southern Africanist studies due to its links with an iniquitous migrant labour system Literature on other African regions often views circular migration more positively This book reviews the current evidence about circular migration and urbanization in sub-Saharan Africa The author challenges the dominant view that rural urban migration continues unabated and shows that

circular migration has continued and has adapted with faster out migration in the face of declining urban economic opportunities. The empirical core of the book illustrates these trends through a detailed examination of the case of Zimbabwe based on the author's longstanding research on Harare. The political and economic changes in Zimbabwe since the 1980s transformed Harare from one of the best African cities to live in over this period to one of the worst. Harare citizens' livelihoods exemplify in microcosm the central theme of the book: the re-invention of circulation and rural-urban links in response to economic change.

Deborah Potts is a Senior Lecturer in the Geography Department of King's College London. She works in the broad research field of urbanization and migration in sub-Saharan Africa, particularly southern Africa, and has conducted research on these themes in Harare in Zimbabwe since 1985.
