Davis,2003-02-28 Leadership is an activity that not only manifests itself in formal positions but also bubbles up in various places within an organization Perhaps given the importance of leadership to any endeavor the literature on this topic has burgeoned Yet among these titles Learning to Lead stands out as one of the best texts available on leadership for college and university administrators Critical skills such as managing people resolving conflict and making rational and legal decisions are explored within the context of the campus The book also addresses the needs of those who facilitate leadership workshops serve as mentors to potential leaders and teach courses on higher education leadership and administration While presenting all sides of key issues the author calls for the reader to define his or her own position through a series of provocative reflection questions in each chapter Thus the book invites interaction and teaches administrators not what to think about leadership but how to think about it **The Emotional Dynamics of Law and Legal Discourse** Heather Conway,John Stannard,2016-12-15 In his seminal work Emotional Intelligence Daniel Goleman suggests that the common view of human intelligence is far too narrow and that emotions play a much greater role in thought decision making and individual success than is commonly acknowledged The importance of emotion to human experience cannot be denied yet the relationship between law and emotion is one that has

largely been ignored until recent years. However, the last two decades have seen a rapidly expanding interest among scholars of all disciplines into the way in which law and the emotions interact, including the law's response to emotion and the extent to which emotions pervade the practice of the law. In *The Emotional Dynamics of Law and Legal Discourse*, a group of leading scholars from both sides of the Atlantic explore these issues across key areas of private law, public law, criminal justice, and dispute resolution, illustrating how emotion infuses all areas of legal thought. The collection argues for a more positive view of the role of emotion in the context of legal discourse and demonstrates ways in which the law could, in the words of Goleman, become more emotionally intelligent. *The Negotiator's Fieldbook*, Andrea Kupfer Schneider, Christopher Honeyman, 2006. This book provides a comprehensive reference guide to negotiation and mediation. Negotiation skills can be learned everything from managing fairness and power and understanding the other side and cultural differences to decision making, creativity, and apology. Good negotiation is best approached from a multidisciplinary perspective that combines the best of theory and practice.
