Public utility rate proposals of President Carter's energy program (part E of S. 1469) United States. Congress. Senate. Committee on Energy and Natural Resources. Subcommittee on Energy Conservation and Regulation, 1978 *Topological Spaces* Gerard Buskes, Arnoud van Rooij, 2012-12-06 This book is a text not a reference on Point set Topology It addresses itself to the student who is proficient in Calculus and has some experience with mathematical rigor acquired e g via a course in Advanced Calculus or Linear Algebra To most beginners Topology offers a double challenge In addition to the strangeness of concepts and techniques presented by any new subject there is an abrupt rise of the level of abstraction It is a bad idea to teach a student two things at the same moment To mitigate the culture shock we move from the special to the general dividing the book into three parts 1 The Line and the Plane 2 Metric Spaces 3 Topological Spaces In this way the student has ample time to get acquainted with new ideas while still on familiar territory Only after that the transition to a more abstract point of view takes place Elementary Topology preeminently is a subject with an extensive array of technical terms indicating properties of topological spaces In the main body of the text we have purposely restricted our mathematical vocabulary as much as is reasonably possible Such an enterprise is risky Doubtlessly many readers will find us too thrifty To meet them halfway in Chapter 18 we briefly introduce and discuss a number of topological properties but even there we do not touch on paracompactness complete normality and extremal disconnectedness just to mention three terms that are not really esoteric

essential and inspiring read for everyone interested in our collective future A revolution in how we age is here Yes ageing is inevitable one year from now we will all be a year older that will never change What can and will change is how we age and how we can all take a much bolder approach to doing it with vigour and joy The time has come to cast off prejudices and to blur the lines of what is possible and permissible at every stage of life In other words we need to learn to re imagine our approach to later life Emboldening ourselves in older age demands big structural changes For a start we will have to tear up the old script that locks us into devoting the early part of our life to education the middle chunk to working and raising kids and whatever is left over at the end to leisure In an age inappropriate world these silos will dissolve We ll embrace the idea that we can carry on learning from start to finish that we can work less and devote more time to family leisure and giving back to our communities in our middle years and that we can remain active and engaged in our later years Carl Honor has travelled the globe speaking to influential figures who are bucking preconceived notions of age whether at work or in their personal lives He looks at the cultural medical and technological developments that are opening new possibilities for us all
