children since the Korean War with remarkably extensive research and great verve Charles K Armstrong Columbia University Arissa Oh argues that international adoption began in the aftermath of the Korean War First established as an emergency measure through which to evacuate mixed race GI babies it became a mechanism through which the Korean government exported its unwanted children the poor the disabled or those lacking Korean fathers Focusing on the legal social and political systems at work To Save the Children of Korea shows how the growth of Korean adoption from the 1950s to the 1980s occurred within the context of the neocolonial US Korea relationship and was facilitated by crucial congruencies in American and Korean racial thought government policies and nationalisms Korean adoption served as a kind of template as international adoption began in the late 1960s to expand to new sending and receiving countries Ultimately Oh demonstrates that although Korea was not the first place that Americans adopted from internationally it was the place where organized systematic international adoption was born Absolutely fascinating Giulia Miller Times Higher Education Gracefully written Oh shows us how domestic politics and desires are intertwined with geopolitical relationships and aims Naoko Shibusawa Brown University Poignant wide ranging analysis and research Kevin Y Kim Canadian Journal of History Illuminates how the spheres of public and private domestic and political are deeply imbricated and complicate American ideologies about family nation and race Kira A Donnell Adoption Culture **The Living Church** ,2000-07 **Adopting Information Systems**

Perspectives from Small Organizations Özgün Imre,2017-12-08 Why do organizations adopt information systems Is it just because of financial reasons of concerns for efficiency Or is it due to external pressures such as competitor pressure that an organization adopts an information system And how does the adoption take place Is it a linear process or is the process one of conflicts Does a specific person govern this process or do we have multiple parties involved What happens if these conflicts occur among those involved How does the organization move on and achieve a successful information system adoption By investigating two organizations one international academic journal and one South American manufacturing company this thesis aims to investigate the whys and hows of information system adoption and aims to contribute to the discourse on information system adoptions in small organizations an often underrepresented segment in information system adoption literature By adopting different theoretical lenses throughout the five research papers included this body of work suggests that even when seemingly simple information system adoptions can become rather complex The cases reveal that the role of information systems and issues related to information system adoptions are often not well thought out in the early days of the organization The actors understandings of adoption and consequences mature and the information systems become more intertwined Common use of stakeholder theory introduces general stakeholders and their interaction with the focal organization The cases reveal that the adoption process involves multiple actors even within what would initially appear as a stakeholder and that those actors can be in conflict with each other These conflicts often lead to negotiations and the cases reveal that these negotiations are opportunities of learning the actors engage with the information system and with

each other gaining new knowledge about the issues at hand The dissertation argues that there are various social worlds in information system adoptions and various factors ranging from organizational structure to social norms that often affect why and how the organization undergoes an adoption process The multiple power relations and divergent interests of stakeholders in these adoption processes and how information systems affect other parts of the organization reinforce the need for a well thought out flexible and reflexive approach to information system adoptions **The Electrical Journal**, 1898 Adoption and Foster Care, 1975 United States. Hernandez, Heewon Chang, Wendy A. Bilgen, 2022-03-30 A 2023 SPE Outstanding Book Award Winner Can transformation be the primary goal of autoethnographic research In this book the authors present a compelling case that this is indeed possible Since autoethnography first appeared as a nascent approach to social inquiry much has been written about it as a useful addition to the field of qualitative research methods Over the years its usage has been extended across various disciplines including the humanities human services social sciences leadership studies engineering education counseling and even medical education Notably the primary function of autoethnography to advance our understanding around sociocultural phenomena has been increasingly paired with a parallel function of the many ways in which this research method can also contribute to practice However though its contribution to scholarship is well documented less has been written about its practical usage as the focal point of inquiry Yet there is growing evidence that one of the emerging strengths of autoethnography is its transformative capabilities In Transformative Autoethnography for Practitioners Hernandez Chang and Bilgen turn the spotlight on autoethnography as a tool for practitioners where the primary goal is to solve real world

problems by facilitating transformational change at the individual group and or organizational levels They draw on existing scholarship as well as their collective work and expertise to provide a Transformative Autoethnographic Model TAM for use by practitioners who are intent on effecting such changes in their respective contexts The book contains seven chapters Chapters One through Three provide the theoretical grounding for a transformative autoethnography model Chapter One begins with a broad overview of autoethnographic research and the unique characteristics of this method that makes it especially suited for effecting transformational learning In chapters Two and Three the authors provide a quick review of the literature relevant to individual autoethnography and collaborative autoethnography respectively Each chapter discussion is centered around explicating the transformative elements of the method as well as how it is able to effect change at the individual group and organizational level Chapters Four through Six focus on the praxis of transformative autoethnography In Chapter Four the transformative autoethnography model TAM is presented in detail and templates are provided for its application Chapters Five and Six show the application of the TAM in a variety of settings The book ends with a final chapter discussion on the continuing evolution of autoethnographic explorations as well as future applications for the TAM model in a fast changing digital landscape Perfect for courses such as Research Methods in the Social Sciences Qualitative Research Methods Narrative Research Advanced Qualitative Research Methods Coaching and Consulting Leading Change
