## **Straight Talk Stimulating Ideas For True Academic:**

**Straight Talk** Harlynn LaVance Hammonds, 2004-02 *Academic Writing, Real World Topics* Michael Rectenwald, Lisa Carl, 2015-05-28 *Academic Writing Real World Topics* fills a void in the writing across the curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, *Academic Writing Real World Topics* introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity, and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader or from one of many resources included in each chapter's Suggested Additional Resources. Part II, *Real World Topics*, also refers extensively to the Guide. Thus the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content. **HIV Treatment and Prevention Technologies in International Perspective** M. Davis, C.

Squire, 2010-02-03 This edited collection investigates the biomedical and social technologies used to control the HIV pandemic through case studies and critical commentaries from Africa, Europe, North America, and Australia. With reference to global and local complexities, the volume engages with HIV treatment, access, community-based health promotion, sexual health, HIV prevention, and the relations between treatment and prevention. The volume includes chapters from leading authors in their fields and takes a transdisciplinary approach by making reference to theoretical and empirical research from sociology, psychology, cultural studies, and science and technology studies, thus helping to establish new ways of understanding current and future configurations of HIV technologies. *Real World Psychology* Catherine A.

Sanderson, Karen R. Huffman, 2024-11-13 A comprehensive college-level introduction to the field of psychology, *Real World Psychology: Applications of Psychological Science* provides a well-balanced survey of the field with emphasis on scientific thinking and practical applications of psychological science that can expand, enhance, and change students' experience of the world around them. Every chapter engages students through illustrative examples and cases, thought-provoking questions, and real psychological research. Updated with recent research that underscores the importance and power of psychology in everyday life, the fourth edition of *Real World Psychology* invites curiosity in a Why-focused framework of special features.
