first succeeded in counting his ten fingers and in dividing an apple into two approximately equal parts Every puzzle that is worthy of consideration can be referred to mathematics and logic Every man woman and child who tries to reason out the answer to the simplest puzzle is working though not of necessity consciously on mathematical lines Even those puzzles that we have no way of attacking except by haphazard attempts can be brought under a method of what has been called glorified trial a system of shortening our labours by avoiding or eliminating what our reason tells us is useless It is in fact not easy to say sometimes where the empirical begins and where it ends Green Thumbs Laurie Carlson,1995-03-01 Budding gardeners will learn what it takes to make things grow with fun activities that require only readily available materials
