Transfer, Development, and Splice Length for Strand/reinforcement in High-strength Concrete Julio A. Ramirez, Bruce W. Russell, National Cooperative Highway Research Program, 2008 This report documents research performed to develop recommended revisions to the AASHTO LRFD Bridge Design Specifications to extend the applicability of the transfer development and splice length provisions for prestressed and non prestressed concrete members to concrete strengths greater than 10 ksi The report details the research performed and includes recommended revisions to the AASHTO LRFD Bridge Design Specifications The material in this report will be of immediate interest to bridge designers Foreword

**Mathematics of Complexity and Dynamical Systems** Robert A. Meyers, 2011-10-05 Mathematics of Complexity and Dynamical Systems is an authoritative reference to the basic tools and concepts of complexity systems theory and dynamical systems from the perspective of pure and applied mathematics Complex systems are systems that comprise many interacting parts with the ability to generate a new quality of collective behavior through self organization e g the spontaneous formation of temporal spatial or functional structures These systems are often characterized by extreme sensitivity to initial conditions as well as emergent behavior that are not readily predictable or even completely deterministic The more than 100 entries in this wide ranging single source work provide a comprehensive explication of the theory and applications of mathematical complexity covering ergodic theory fractals and multifractals dynamical systems perturbation theory solitons systems and control theory and related topics Mathematics of Complexity and Dynamical Systems is an essential reference for all those interested in mathematical complexity from undergraduate and graduate students up through professional researchers

*Introduction to Computational Proteomics* Golan Yona, 2010-12-09 Introduction to Computational Proteomics introduces the field of computational biology through a focused approach that tackles the different steps and problems involved with protein analysis classification and meta organization The book starts with the analysis of individual entities and works its way through the analysis of more complex entities

**Protection of Historical Constructions** Ioannis Vayas, Federico M. Mazzolani, 2021-12-03 This book gathers the peer reviewed papers presented at the 4th International Conference on Protection of Historical Constructions PROHITECH held in Athens Greece on October 25 27 2021 The conference topics encompass structural and earthquake engineering intervention strategies materials and technologies digital documentation

architecture and urban planning cultural heritage all of which represented by a showcase of case studies covering different construction materials as well as sustainability energy efficiency and adaptation to climate changes As such the book represents an invaluable up to the minute tool providing an essential overview of protection of historical constructions and offers an important platform to researchers engineers and architects     **U.S. Geological Survey Bulletin** ,1983     *Official Gazette of the United States Patent and Trademark Office* ,2002     **Geologic Studies in the Basin and Range-Colorado Plateau Transition in Southeastern Nevada, Southwestern Utah, and Northwestern Arizona, 1992** Robert B.
