The editors felt that the time was right for a book on an important topic the history and development of the notions of chaotic attractors and their natural invariant measures We wanted to bring together a coherent collection of readable interesting outstanding papers for detailed study and comparison We hope that this book will allow serious graduate students to hold seminars to study how the research in this field developed

Limitation of space forced us painfully to exclude many excellent relevant papers and the resulting choice reflects the interests of the editors Since James Alan Yorke was born August 3 1941 we chose to have this book commemorate his sixtieth birthday honoring his research in this field The editors are four of his collaborators We would particularly like to thank Achi Dosanjh senior editor mathematics Elizabeth Young assistant editor mathematics Joel Ariaratnam mathematics editorial and Yong Soon Hwang book production editor from Springer Verlag in New York for their efforts in publishing this book
