institutionalized World Literature and what can be added challenged or changed with this tweaking of the referential terminology Feminism as World Literature redefines the thematic and theoretical contents of World Literature in feminist terms as well as rethinking feminist terms analyses frameworks and concepts in a World Literature context Other ideas built into World Literature and its criticism are viewed here by feminist framings including the environment technology immigration translation work race governance image sound religion affect violence media future and history The authors recognize genres strategies and themes of World Literature that demonstrate feminism as integral to the world making gestures of literary form and production In other words this volume looks to readings and modes of reading that expose how the historical worldliness of texts allows for feminist interventions that might not sit clearly or comfortably on the surfaces

Understanding Adorno, Understanding Modernism Robin Truth Goodman, 2020-11-12 Having studied philosophy at a time when its traditions were being seriously uprooted by the atrocities of World War II Theodor Adorno had an enormous impact on thinking about aesthetics at a transitional historical moment when the philosophy of science and leftist politics were looking for new ground Moreover with his focus on the rise of commercial culture and its effects on identity construction Adorno can be said to have reinvigorated modernist concerns by introducing the prevailing terms in our contemporary versions of cultural politics and cultural studies Understanding Adorno Understanding Modernism traces Adorno's social and aesthetic ideas as they appear and reappear in his corpus As per other volumes in the series this book is divided into three parts The first Adorno's Keywords is organized by the aesthetic terms around which Adorno's philosophy circulates The second section is devoted to Adorno and Aesthetics While Adorno's philosophical viewpoints influenced modernism's evolution into the 21st century the history of modernist aesthetics also shaped his philosophical approaches The third and final part Adorno's Constellations discusses how aesthetic form in Adorno's thinking underlies the terms of his social analysis

The Disaster of Resilience Kenneth J. Saltman, 2023-12-14 The past decade has seen a vast expansion of resilience pedagogies policies and products in public education from the Every Student Succeeds Act to social and emotional learning to grit Educational apps avatars and games as well as behaviorist techniques meditation programs and biometric devices claim to teach resilience to adverse social conditions while new cyber schools education brokers global democracy promotion companies and dropout recovery firms promise schools resilience to disaster and

disruption The Disaster of Resilience shows how resilience discourse is interwoven with the new digital directions of educational privatization Saltman argues that resilience has provided the justification for new educational profiteering creating a climate which individualizes collective responsibilities depoliticizes and dehistoricizes knowledge and curriculum and falsely grounds its politics in a mashup of pseudoscience and human capital theory He argues that we must replace resilience discourse with pedagogies and curriculum that allow students not only to endure the intolerable conditions they find themselves in but to see beyond those conditions and to act collectively on the social economic and racial injustices that created them *Education as Civic Engagement* Gary A. Olson, Lynn Worsham, 2012-08-16 *Education as Civic Engagement Toward a More Democratic Society* is a collection of ten essays examining education mostly higher education as civic engagement These essays are the finest works of scholarship on education published over the last decade in JAC an award winning journal of rhetoric politics and culture Collectively the works in this volume analyze in a substantive and rigorous manner a number of key issues in the politics of education

Financial Literacy Education Chris Arthur, 2012-10-13 Consumer financial literacy education often appears as a helpful commonsense solution to neoliberalism and the individualization of responsibility for economic risk However in *Financial Literacy Education Neoliberalism the Consumer and the Citizen* this particular literacy is argued to be

both ineffective and unjust. Socially created poverty, unemployment, and economic insecurity require more than individual consumer solutions; they require collective responses by engaged critical citizens. Utilizing concepts from Marx, Foucault, Bourdieu, and Baudrillard, this book challenges those who claim that there is no alternative to neoliberal insecurity and reduce education to a consumerist training of entrepreneurial consumer citizens who can continually invest in themselves and the market. Through an analysis of consumer financial literacy education's present and historical supports as well as its likely effects, this book argues that the choice before us is not financial illiteracy or financial literacy. Rather, the choice is between subjugation to the requirements of perpetual competition or overcoming alienation, insecurity, and exploitation. The critical financial literacy education outlined at the end of this book supports this. This book will appeal to those interested in understanding the conditions of our freedom in an increasingly financialized world: critical educators, philosophers, and sociologists of education, and financial literacy researchers.

Handbook of Critical Approaches to Politics and Policy of Education Kenneth J. Saltman, Nicole Nguyen, 2022-04-27. The *Handbook of Critical Approaches to Politics and Policy of Education* provides a broad overview of educational policy and politics from critical perspectives engaging with both foundational and cutting edge topics. In critical perspectives, educational policy debates and programs for reform are about more than narrow questions of efficacy: say to raise test scores or for simply more educational inclusion, fairer school spending, or even cultural responsiveness. Rather, policy and reform debates represent contested visions for schools and society by social groups vying for hegemony. Critical approaches to educational policy and politics see schooling and education more broadly as contested terrain in which competing visions for education are imbricated with the material and symbolic interests and cultural ideologies of different classes and cultural groups. Chapters in this volume are organized into five sections. The first three sections provide a foundational overview to educational policy and politics covering culture and politics of education, political economy of education, and subjectivity and education. These chapters address longstanding and current policy and political debates as well as foundational theoretical debates. The last two sections are organized around two themes that address some of the most significant recent directions of educational politics and policy: disaster politics and technology.
