offers new and engaging perspectives on the significance of sound in its material and cultural forms Absolute Music.
Mechanical Reproduction Arved Ashby, 2010-06-07 Recordings are now the primary way we hear classical music especially
the more abstract styles of absolute instrumental music In this original provocative book Arved Ashby argues that recording
technology has transformed our understanding of art music Contesting the laments of nostalgic critics Ashby sees recordings

as socially progressive and instruments of a musical vernacular but also finds that recording and absolute music actually involve similar notions of removing sound from context He takes stock of technology's impact on classical music addressing the questions at the heart of the issue This erudite yet concise study reveals how mechanical reproduction has transformed classical musical culture and the very act of listening breaking down aesthetic and generational barriers and mixing classical music into the soundtrack of everyday life Listening in Action Rebecca M Rinsema,2016-10-14 In an age when students come to class with more varied music listening preferences and experiences than ever before music educators can find themselves at a loss for how to connect with their students Listening in Action provides the beginnings of a solution to this problem by characterizing students contemporary music listening experiences as they are mediated by digital technologies Several components of contemporary music listening experiences are described including the relationship between music listening experiences and listener engagements with other activities listener agency in creating playlists and listening experiences as a whole and the development of adolescent identities as related to the agency afforded by music listening devices The book provides an accessible introduction to scholarship on music listening across the disciplines of musicology ethnomusicology sociology of music psychology of music and music education By reading Listening in Action music educators can gain an understanding of recent theories of music listening in everyday life and how those theories might be applied to bridge the gap between music pedagogies and students who encounter music in a heavily mediated postperformance world

Audible Infrastructures Kyle Devine, Alexandrine Boudreault-Fournier, 2021 Our day to day musical enjoyment seems so simple so easy so automatic Songs instantly emanate from our computers and phones at any time of day The tools for playing and making music such as records and guitars wait for us in stores ready for purchase and use And when we no longer need them we can leave them at the curb where they disappear effortlessly and without a trace These casual engagements often conceal the complex infrastructures that make our musical cultures possible *Audible Infrastructures* takes readers to the sawmills mineshafts power grids telecoms networks transport systems and junk piles that seem peripheral to musical culture and shows that they are actually pivotal to what music is how it works and why it matters Organized into three parts dedicated to the main phases in the social life and death of musical commodities resources and production circulation and transmission failure and waste this book provides a concerted archaeology of music s media

infrastructures As contributors reveal the material environmental realities and political economic conditions of music and listening they open our eyes to the hidden dimensions of how music is made delivered and disposed of In rethinking our responsibilities as musicians and listeners this book calls for nothing less than a reconsideration of how music comes to sound
