Strangers In The Universe:

Strangers in This World Hussam S. Timani, Allen G. Jorgenson, Alexander Y. Hwang, 2015 Immigration is one of the most hotly debated topics today But the question involves more than politics and emotion it includes such critical issues as law justice human rights human dignity and freedom *Strangers in This World* is a collection that brings together an international consortium of scholars to reflect on the religious political anthropological and social realities of immigration through the prism of the historical and theological resources insights and practices across an array of religious traditions The volume reflecting the diversity of religious cultures is nevertheless unified in arguing that immigration is an important aspect of the major religions and is found at their core The contributors unfold this important dimension of the religious traditions and explore the ways that the theme of immigration connects to vital points of theological reflection and practice in Hinduism Buddhism Judaism Christianity Islam and Native American religious traditions At root the volume is about our collective journey together as immigrant peoples who have stories and settlements to share as well as challenges and struggles to overcome that may be faced through the resources our many faiths offer

Strangers in the Universe Clifford D. Simak, 1956 **Strangers Nowhere in the World** Margaret C. Jacob, 2016-12-02 The mingling of aristocrats and commoners in a southern French city the jostling of foreigners in stock markets across northern and western Europe the club gatherings in Paris and London of genteel naturalists busily distilling plants or making air pumps the ritual fraternizing of brothers in privacy and even secrecy Margaret Jacob invokes all these examples in *Strangers Nowhere in the World* to provide glimpses of the cosmopolitan ethos that gradually emerged over the course of the seventeenth and eighteenth centuries Jacob investigates what it was to be cosmopolitan in Europe during the early modern period Then as now being cosmopolitan meant the ability to experience people of different nations creeds and colors with pleasure curiosity and interest Yet such a definition did not come about automatically nor could it always be practiced easily by those who embraced its principles Cosmopolites had to strike a delicate balance between the transgressive and the subversive the radical and the dangerous the open minded and the libertine Jacob traces the history of this precarious balancing act to illustrate how ideals about cosmopolitanism were eventually transformed into lived experiences and practices From the representatives of the Inquisition who found the mixing of Catholics and Protestants and other types of border crossing disruptive to their authority to the struggles within urbane masonic lodges to open membership to Jews Jacob also charts the moments when the cosmopolitan impulse faltered Jacob pays particular attention to the impact of science and merchant life on the emergence of the cosmopolitan ideal In the decades after 1650 modern scientific practices coalesced and science became an open enterprise Experiments were witnessed in social settings of natural inquiry congenial for the inculcation of cosmopolitan mores Similarly the public venues of the stock exchanges brought strangers and foreigners together in ways encouraging them to be cosmopolites The amount of international and

global commerce increased greatly after 1700 and luxury tastes developed that valorized foreign patterns and designs Drawing upon sources as various as Inquisition records and spy reports minutes of scientific societies and the writings of political revolutionaries *Strangers Nowhere in the World* reveals a moment in European history when an ideal of cultural openness came to seem strong enough to counter centuries of chauvinism and xenophobia Perhaps at no time since Jacob cautions has that cosmopolitan ideal seemed more fragile and elusive than it is today

Strangers and the Enchantment of Space in Victorian Fiction, 1830-1865 Kristen Pond, 2023-10-20 Tracing the origins of how we think about strangers to the Victorian period *Strangers and the Enchantment of Space in Victorian Fiction 1830 1865* explores the vital role strangers had in shaping social relations during the cultural transformations of the Industrial Revolution transportation technologies and globalization While studies of nineteenth century Britain tend to trace the rise of an aloof cosmopolitanism and distancing narrative strategies this volume calls attention to the personalizing impulse in nineteenth century literary form investigating the deeply personal reflections on individual and national identities In her book Dr Pond leads the reader through homes of the urban poor wandering the Great Exhibition in the Crystal Palace loitering in suburban neighborhoods riding the railway and touring a country estate Readers will experience how the ordinary can be enchanting and how the mundane can be unexpected discovering a new way of thinking about strangers and their influence on our lives Through an examination of the short and long fictional forms of Martineau Dickens Bront Gaskell and Braddon this study

locates the figure of the stranger as a powerful topos in the story of Victorian literature and the ethics of social relations This book will be ideal for those seeking to understand the dynamics of the stranger in Victorian fiction as a figure for understanding the changing dynamics of social relations in England in the early nineteenth century *Time And Science (In 3 Volumes)* Remy Lestienne,Paul Harris,2023-06-21 Prominent scientists and philosophers of science address contemporary debates on the nature of Time Their contributions freely discuss its unity and reality its compatibility with the orders of classical philosophy present past and future and with the disputed idea of free will Volume 1 They also present a detailed and updated state of the role of Time in the so called exact sciences biology or more precisely genetics evolution neurosciences natural and artificial intelligence Volume 2 and physics relativity quantum mechanics and quantum gravity and cosmology Volume 3 **The Modern Stranger** Lesley D. The Time And Science - Volume 1: Metaphysics Of Time And Its Evolution Remy Lestienne,Paul Harris,2023-06-22 In this volume 12 eminent scientists and philosophers engage in fundamental perennial questions about time Does time exist Is time a single or multiple entity Is it possible to reconcile contradictory notions of time such as subjective and objective metaphysics and physics McTaggart s A series and B series or presentism and eternalism Does the Special Theory of Relativity dictate a static deterministic account of reality block universe or does it allow for free will How did the concept of geologic time originate and what are the limits of its knowledge How is the Anthropocene defined Each author examines these questions from the point of view of their own specialties but without ignoring the metaphysical importance of the issue nor the possibility that scientific advances might enforce revisions of our brain intuitive judgments *Strangers in Paradise* David Mittelberg,1988-01-01 The literature on the Kibbutz is large and sprawling This stands in marked contrast to the intimacy and proximity of the individuals who have actually participated in the life of the Kibbutz In this quite remarkable work David Mittelberg succeeds in capturing the specific life styles and aspirations of the Kibbutzniks And he does so by integrating this within the broad and rich traditions of the sociology of culture and religion Strangers in Paradise provides a massive amount of current data on Jewish and non Jewish volunteers division of labor by sex and language of origins demographic characteristics of Kibbutz hosts and recruits and a variety of attitude measures far beyond any other work in the literature But what gives special value to this effort is its unusual utilization of the phenomenological tradition from Simmel to Schutz to Berger and Luckmann along with recent efforts in organization and negotiation theory from Blau to

Goffman in order to explicate this massive data A special element in this volume is the central place accorded to voluntarism in an open culture For Mittelberg membership in the Kibbutz is at its core a voluntary act of individuals who commit their lives or a portion thereof to a collective movement in a strange land This is a study then in intentional communities rather than Utopian organizations The synthesis of the concrete and the abstract the empirical and the theoretical will establish Mittelberg's volume as a new standard in Kibbutz studies Short Story Index: 1955-1958, 1960 **Strangely Rhetorical** Jimmy Butts, 2023-05-01 Strangely Rhetorical establishes the groundwork for strangeness as a lens under the broader interdisciplinary umbrella of rhetoric and composition and shares a series of rhetorical devices for practically thinking about how compositions are made unique Jimmy Butts explores how strange novel weird and interesting texts work and offers insight into how and why these forms can be invented created and stylized to generate the effective delivery of rhetorical messages in fun divergent ways Using a new theoretical framework that strangeness is inherent within all rhetorical interactions and is potentially useful Butts demonstrates how rhetoric is always already coming from an Other offering an ethical context for how defamiliarized texts work with different audiences Applying examples of seven figures for composing in and across written aural visual electronic and spatial texts the WAVES of media Butts shows how divergence is possible in all sorts of refigured multimodal ways Strangely Rhetorical rethinks what exactly rhetoric is and does considering the ways that strange compositions help rhetors connect across a broad range of networks in a world haunted by distance This is a book about strange rhetoric for makers and creatives for students and teachers and for composers of all sorts **Cinema, Space, and Polylocality in a Globalizing China** Yingjin Zhang, 2009-10-09 In this milestone work prominent China film scholar Yingjin Zhang proposes polylocality as a new conceptual framework for investigating the shifting spaces of contemporary Chinese cinema in the age of globalization Questioning the national cinema paradigm Zhang calls for comparative studies of underdeveloped areas beyond the imperative of transnationalism The book begins by addressing theories and practices related to space place and polylocality in contemporary China before focusing on the space of scholarship and urging scholars to move beyond the current paradigm and explore transnational and comparative film studies This is followed by a chapter that concentrates on the space of production and surveys the changing landscape of postsocialist filmmaking and the transformation of China's urban generation of directors Next is an examination of the space of polylocality and the cinematic mappings of Beijing and a persistent reel contact with polylocality in hinterland China In the fifth chapter Zhang explores the space of subjectivity in independent film and video and contextualizes experiments by young directors with various documentary styles Chapter 6 calls attention to the space of performance and addresses issues of media and mediation by way of two kinds of playing the first with documentary as troubling information the second with piracy as creative intervention The concluding chapter offers an overview of Chinese cinema in the new century and provides production and reception statistics Combining inspired critical insights original observations and new information Cinema

Space and Polylocality in a Globalizing China is a significant work on current Chinese film and a must read for film scholars and anyone seriously interested in cinema more generally or contemporary Chinese culture *The Two Sovereigns* Keith Tester, 2002-01-31 Keith Tester examines modernity through the prism of the two sovereigns of the individual and the collectivity It is a stimulating meditation on the difficult and contradictory experiences of European modernity **Agon, Logos, Polis** Jóhann Páll Árnason, 2001 Ten papers from a conference held at Ohio State University in 1997 reconsider Greek experience and its lessons for later cultures from a variety of perspectives The contributions reflect in particular the central role of politics and the Polis so distinctively and uniquely Greek in the development of Greek culture The papers also consider Greek philosophy drama and the Greek view of the natural and divine world around them and demonstrate the continuing influence of Hellenism by discussing modern adaptations of Greek models Contributors include Johann Arnason Cornelius Castoriadis Vassilis Lambropoulos Christian Meier Oswyn Murray Peter Murphy Kurt Raaflaub Louis Ruprecht Jean Pierre Vernant and Pierre Vidal Naquet **Lacan and Contemporary Film** Todd McGowan, 2020-09-08 This unique volume collects a series of essays that link new developments in Lacanian psychoanalytic theory and recent trends in contemporary cinema Though Lacanian theory has long had a privileged place in the analysis of film film theory has tended to ignore some of Lacan's most important ideas As a result Lacanian film theory has never properly integrated the disruptive and troubling aspects of the filmic experience that result from the encounter with the Real that this experience makes possible Many contemporary theorists emphasize the importance of the encounter with the Real in Lacan's thought but rarely in discussions of film By bringing the encounter with the Real into the dialogue of film theory the contributors to this volume present a new version of Lacan to the world of film studies These essays bring this rediscovered Lacan to bear on contemporary cinema through analysis of a wide variety of films including Memento Eyes Wide Shut Breaking the Waves and Fight Club The films discussed here demand a turn to Lacanian theory because they emphasize the disruptive role of the Real and of jouissance in the experience of the human subject There is a growing number of films in contemporary cinema that speak to film's power to challenge and disturb the complacency of spectators and the essays in Lacan and Contemporary Film analyze some of these films and bring their power to light Because of its dual focus on developments in Lacanian theory and in contemporary film this collection serves as both an accessible introduction to current Lacanian film theory and an introduction to the study of contemporary cinema Each essay provides an accessible jargon free analysis of one or more important films and at the same time each explains and utilizes key concepts of Lacanian theory The collection stages an encounter between Lacanian theory and contemporary cinema and the result is the enrichment of both **Reading the New Testament in the Manifold Contexts of a Globalized World** Eve-Marie Becker, Jens Herzer, Angela Standhartinger, Florian Wilk, 2022-12-12 This volume gathers the perspectives of teachers in higher education from all over the world on the topic of New Testament scholarship The goal is to understand and describe the contexts and conditions under which New Testament research is

carried out throughout the world This endeavor should serve as a catalyst for new initiatives and the development of questions that determine the future directions of New Testament scholarship At the same time it is intended to raise awareness of the global dimensions of New Testament scholarship especially in relation to its impact on socio political debates The occasion for these reflections are not least the present questions that have been posed with the corona pandemic and have received a focus on the system relevance of churches which is openly questioned by the media The church and theology must face this challenge Towards that end it is important to gather impulses and suggestions for the discipline from a variety of contexts in which different dimensions of context related New Testament research come to the fore

Collaborative Networks and Their Breeding Environments Luis M. Camarinha-Matos, Hamideh Afsarmanesh, Angel Ortiz, 2006-03-09 Progress in collaborative networks continues showing a growing number of manifestations and has led to the acceptance of Collaborative Networks CN as a new scientific discipline Contributions to CN coming from multiple reference disciplines has been extensively investigated In fact developments in CN have benefited from contributions of multiple areas namely computer science computer engineering communications and networking management economy social sciences law and ethics etc Furthermore some theories and paradigms defined elsewhere have been suggested by several research groups as promising tools to help define and characterize emerging collaborative organizational forms Although still at the beginning of a long way to go there is a growing awareness in the research and academic world for the need to establish a stronger theoretical foundation for this new discipline and a number of recent works are contributing to this goal From a utilitarian perspective agility has been pointed out as one of the most appealing characteristics of collaborative networks to face the challenges of a fast changing socio economic context However during the last years it became more evident that finding the right partners and establishing the necessary preconditions for starting an effective collaboration process are both costly and time consuming activities and therefore an inhibitor of the aimed agility Among others obstacles include lack of information e g non availability of catalogs with normalized profiles of organizations and lack of preparedness of organizations to join the collaborative process Overcoming the mismatches resulting from the heterogeneity of potential partners e g differences in infrastructures corporate culture methods of work and business practices requires considerable investment Building trust a pre requisite for any effective collaboration is not straight forward and requires time Therefore the effective creation of truly dynamic collaborative networks requires a proper context in which potential members are prepared to rapidly get engaged in collaborative processes The concept of breeding environment has thus emerged as an important facilitator for wider dissemination of collaborative networks and their practical materialization The PRO VE 05 held in Valencia Spain continues the 6th event in a series of successful working conferences on virtual enterprises This book includes selected papers from that conference and should become a valuable tool to all of those interested in the advances and challenges of collaborative networks

Earth, Sea and Sky, Or, Marvels of

the Universe Henry Davenport Northrop, 1887 Disturbing Conventions Rachel V Harrison, 2014-04-15 Disturbing Conventions draws the study of Thai literature out of the relative isolation that has to date impeded its participation in the wider field of comparative and world literature Predominantly penned by Thai academics the collection decentres Thai literary studies in order to move beyond the traditionalist conservative concerns of the academy which have until relatively recently foreclosed the use of Western theory in the study of Thai literature The book introduces new frames of analysis to the study of Thai literature to bring it into dialogue with debates in wider fields and the world beyond its national borders As a result Disturbing Conventions offers an essential contribution to the comparative study of world literature and Asian cultural studies
