Hemisynthesis of phenolic metabolites (Band 10) Sarah Straßmann, 2021-11-18 Polyphenols are considered healthy because they are supposed to protect people from civilization diseases such as cardiovascular diseases cancer or diabetes This may be due to the inhibition of inflammation or their antioxidant effects However there is still a lot of research to be done in this direction because their absorption distribution metabolism and excretion depend on many factors Moreover it is possible that the metabolites have a different bioactivity than the original substances Therefore it is necessary to accurately identify and quantify the anthocyanin metabolites and for that reference substances are urgently needed Because they are not commercially available and cannot be isolated from plants or physiological samples their synthesis is indispensable Their synthesis can be achieved in different

ways the most obvious realized in this work are enzymatic or chemical approaches To analyze the results in an advanced way ion mobility mass spectrometry coupled to a qToF was used From the obtained data it is possible to establish a database which may be used to identify metabolites in real biological samples This is a benefit for the untargeted metabolomics and allows further elucidation of the metabolism of anthocyanins and thus the health promoting effect of anthocyanins

Dynemicin A, Uncialamycin and Analogues Daniel Best, Mickael Jean, Pierre Van De Weghe, 2016-06-14 Enediynes are natural products with highly active cytotoxicity and antibacterial activity and thus have significant potential in the development of anti cancer treatments However they are not readily available and can degrade rapidly during isolation one solution is to produce them using total synthesis Dynemicin A and uncialamycin are two such enediynes with similar structures for which total synthesis has been achieved This book presents the isolation and preparation of these two compounds and their analogues through various synthesis strategies Details of the structural elements essential to their anti cancer activity are presented with the objective of explaining and optimizing their biological activities and potential development as drugs Presents two natural nediynes with similar structures whose total syntheses have been accomplished Explores structural analogs of preparation for purposes of optimizing the anti cancer activity Describes the total syntheses of dynemicin A the uncialamycine as well as analogs by emphasizing the synthesis strategies adopted Features studies of the biological activities and data to bring out the structural elements of these essential compounds Multicomponent Reactions towards Heterocycles Erik Van der Eycken, Upendra K. Sharma, 2022-03-21 Presents a wide ranging overview of essential topics and recent advances in MCR chemistry Heterocycles are a central component in natural product chemistry pharmaceuticals agrochemicals and material science New synthetic methodologies integrating the sequencing of multicomponent reactions MCRs are today being used for the rapid synthesis of diversified heterocycles in just one step Multicomponent Reactions towards Heterocycles presents an up to date summary MCR chemistry with a focus on the conjugation between modern synthetic methodologies and MCRs Featuring contributions by leaders in the field this comprehensive resource highlights applications of MCRs in natural products and intermediate synthesis discusses current trends and future prospects in MCR chemistry outlines novel multicomponent procedures and more The authors provide the practical information required for designing new reaction strategies and mechanisms covering topics including MCR based green synthetic methods cyclization and cycloaddition reactions heterocycle multicomponent syntheses in a continuous flow catalytic alkynoyl generation MCR synthesis of saturated heterocycles and C H functionalization and multicomponent reactions Provides a thorough overview of heterocycles as input in multicomponent reactions Discusses recent advances in the field of MCR chemistry and progress in the synthesis and functionalization of heterocycles Demonstrates the use of MCRs to simplify synthetic design and achieve complexity and diversity in novel bioactive molecules Highlights examples of multicomponent polymerizations target oriented synthesis and applications of MCR in medicinal chemistry Explains the

Die regulierte Arzneipflanze Klaus Ferdinand Gärditz, 2025-01-16 Die Pharmazie ist aus der Botanik hervorgegangen. Der heutige Arzneimittelmarkt ist indes geprägt von synthetischen Wirkstoffen, die sich in industriellen Mengen herstellen und als Bestandteil handelsüblicher Fertigarzneimittel in den Verkehr bringen lassen. Gleichwohl werden aus pflanzlichen Arzneidrogen weiterhin Arzneimittel hergestellt. Phytopharmaka sind Vielstoffgemische. Eine Pflanze enthält typischerweise zahlreiche bioaktive Stoffe, die an verschiedenen Targets binden. Das stellt auch an die rechtliche Regulierung besondere Anforderungen. So treten neben den regulierten Arzneimittelzulassungen andere Wege des Marktzugangs wie die Registrierung traditioneller pflanzlicher Arzneimittel. Klaus Ferdinand Gärditz stellt die vielfältigen Regulationsstrukturen im Kontext der Pharmazeutischen Biologie vor und führt mit einer interdisziplinären Lupe durch den bunten Arzneipflanzengarten mit seinen Überraschungen.

Synthetic Organic Chemistry and the Nobel Prize, Volume 3 John G. D'Angelo, 2024-12-19 The Nobel Prize is the highest award in science as is the case with non-science fields too and it is therefore arguably the most internationally recognized award in the world. This unique set of volumes focuses on summarizing the Nobel Prize within organic chemistry as well as the specializations within this specialty. Any reader researching the history of the field of organic chemistry will be interested in this work. Furthermore, it serves as an outstanding resource for providing a better understanding of the circumstances that led to these amazing discoveries and what has happened as a result in the years since.
