Strategic Assessment 1996 Instruments Of Us Power

Hans Binnendijk, Patrick Clawson

Strategic Assessment 1996 Instruments Of Us Power:

Strategic Assessment 1996 Hans Binnendijk, Patrick Clawson, 2004-08-30 In this world of instability and rapid change the U S government needs to muster the full range of options at its command if it is to achieve goals at a price consistent with the resources its citizens are prepared to devote to international affairs Rather than simply deploying the constrained resources made available for some of the traditional foreign policy and national security institutions this report explores how to make use of the opportunities offered by change *1998 Strategic Assessment Engaging Power For Peace* ,1998 Over the past few years the Department of Defense has been intensifying its study of the global security situation U S force posture and future defense requirements The National Defense University contributes to this dialog through Strategic Assessment an annual publication which applies the expertise of this institution through the leadership of its interdisciplinary research arm the Institute for National Strategic Studies with the assistance of specialists from elsewhere in government and academe Offering such analyses in both general and particular areas of interest to the national security community is an important aspect of the NDU mission This volume examines various approaches that the United States might adopt to shape the strategic environment of the future The current environment is characterized by instability and change The U S Government needs to apply the full range of options at its disposal to achieve national goals and ensure the peace and stability required to preserve our rights to life liberty and the pursuit of happiness But such options must be studied and conceptualized for years and in some cases decades in advance to take advantage of the opportunities presented by a changing global environment The recent Quadrennial Defense Review QDR recommended a series of defense posture changes This volume reviews these recommendations and takes the next analytical step to propose what is entailed by such changes Strategic Assessment 1998 Engaging Power for Peace should prove useful beyond the defense establishment to all readers with an interest in national security affairs **Strategic Assessment** ,1997 *Strategic Assessment* National Defense University. Institute for National Strategic Studies,1995 U.S. Army War College Guide to Strategy Joseph R. Cerami, James F. Holcomb, 2001 For more than 3 decades the U S Army War College USAWC Department of National Security and Strategy has faced the challenge of educating future strategic leaders on the subject of national security or grand strategy Fitting at the top of an officer s or government official s career long professional development program this challenge has been to design a course on strategy that incorporates its many facets in a short period of time all within the 1 year senior service college curriculum To do this a conceptual approach has provided the framework to think about strategy formulation The purpose of this volume is to present the USAWC strategy formulation model to students and practitioners This book serves as a guide to one method for the formulation analysis and study of strategy an approach which we have found to be useful in providing generations of strategists with the conceptual tools to think systematically strategically critically creatively and big Balancing what is described in the chapters as ends ways and means remains at the core of the Army War College s approach to national

security and military strategy and strategy formulation **U.S. Army War College Guide to Strategy** , Orchestrating the Instruments of Power D. Robert Worley, 2015-07-15 National security a topic routinely discussed behind closed doors by Washington's political scientists and policy makers is believed to be an insider's game All too often this highly specialized knowledge is assumed to place issues beyond the grasp and interest of the American public Author D Robert Worley disagrees The U S national security system designed after World War II and institutionalized through a decades long power conflict with the Soviet Union is inadequate for the needs of the twenty first century and while a general consensus has emerged that the system must be transformed a clear and direct route for a new national security strategy proves elusive Furnishing the tools to assist in future national security reforms Orchestrating the Instruments of Power articulates and synthesizes the concepts of America's economic political and military instruments of power Project 2015 Patrick M. Cronin, 1997-11 This work looks ahead to the year 2015 and beyond seeking to understand how the Amer armed forces might contribute better to the nation's future security The authors try to conceptualize how a transformed world situation 20 years from now could affect U S security They describe the most plausible changes likely to develop not as prophecy nor as an intelligence forecast but as a considered statement of those recognizable trends that portend the greatest influence on U S security By being cognizant of such plausible alternatives American policy makers would have the chance to pursue or avoid them Strategic Assessment 1996: Instruments of U.S. Power , 1996 This volume analyzes how the utility of various instruments of U S power has changed in recent years primarily owing to the end of the Cold War For that reason we need to set forth our view of the changing international context within which the instruments are applied Our perspective on the emerging new world order was set forth in the first chapter of Strategic Assessment 1995 which we summarize here with some changes in nuance to reflect developments during 1995 and with some additional material to extend the analysis beyond the realm of geostrategy The essential characteristics of the present strategic environment are uncertainty and change The world is going through several types of dramatic changes For heuristic purposes those changes can be grouped into three broad categories geostrategic information and less clearly defined than the others character of government

Unmasking Social Science Imperialism Tatah Mentan, 2015-02-02 Contemporary social science is a product of the capitalist world system and Eurocentrism is constitutive of the geoculture of this system characterized by the parochiality of its universalism assumptions about the superiority of Western civilization and imposition as the sole theory of global progress The creation of these structures of knowledge specifically the institutionalization of the social sciences is a phenomenon that is inextricably linked to the very formation and maturation of Europe's capitalist world system or imperialism There is therefore nothing that is natural logical or accidental about the institutionalization of the social sciences These Europeanized structures of knowledge are imposed ways of producing knowledge of the world This Eurocentrism of social science has justifiably come under increasingly vigorous scrutiny especially in the period since 1945 with the formal decolonization of

Africa Asia and much of the Caribbean This book forcefully argues that if social science is to make any progress in the twenty first century it must overcome its Eurocentric heritage that has distorted social analyses and its capacity to deal with the problems of the contemporary world and embrace other non Western funds of knowledge production **U.S. Foreign**

Policy and the Four Horsemen of the Apocalypse Andrew S. Natsios,1997-03-25 This book explores the emerging phenomenon of complex humanitarian emergencies and the evolving policies of the United States in responding to these emergencies In addition Andrew Natsios examines the relationship of disaster response to U S foreign policy and national interest and makes suggestions for improving both relief strategies and systems for designing those strategies To these issues Natsios brings his first hand experience in numerous key positions Mr Natsios provides case study analysis from these experiences over the past five years to illustrate the arguments presented in the book particularly regarding Somalia Angola Sudan Panama and Kuwait and Kurdistan following the Gulf War As former president George Bush indicates in his foreword to the volume this book will make a substantive contribution to continuing and enhancing vitally important work Of great interest to scholars researchers and policy makers in the areas of contemporary American foreign policy and humanitarian activities abroad **Armed Conflict** Brian Steed,2009-03-25 What challenges will America face in armed conflicts of the

future and how will we prepare for them National security depends upon the ability of the military to predict the future nature of war Despite the difficulty in making such predictions one must remember nation states and other countries will continue to use armed conflict as a means to further their aims and these aims will at times run contrary to American interests As a result the United States will continue to be confronted with armed conflict in the days and years ahead A military theorist and experienced armor officer Brian Steed provides insights into the future of armed conflict by focusing on what has occurred in the past not because the past repeats itself but because it reveals timeless principles of warfare Five battles one each in Korea Vietnam the Falklands the Persian Gulf and Somalia are analyzed historically geographically and strategically Steed s analysis of these engagements clearly demonstrates that the key to victory on the battlefields of the future is the small unit In refreshing layman s prose the author focuses on why the events occurred as they did and explores the significance of each battle in terms of its political and military ramifications He concludes with lessons learned that will greatly benefit future American ground combat commanders Armed Conflict informs the reader about the historical trends of combat operations and the realities of war today and into the future It will also serve to guide a new generation of military and civilian leaders as they prepare to face the inevitable conflicts in the new century Chemical and Biological Warfare

Eric Croddy,1997 Covers the history of this form of warfare information on chemical agents themselves as well as regulation controls and disposal policies Scientific research on CBW extending as far back as 1940 is organized under categories of CBW agents and their corresponding subheadings The Blood Of Abraham, "Intifada, Uprising & Lessons In Asymmetrical Warfare" Major David A. Brown,2015-11-06 A historical case study concerning the Israeli Army s response to the Palestinian

Intifada or uprising in the late 1980 s and early 1990 s provides instructive planning considerations for likely future application of U S military force in an asymmetrical threat environment The monograph specifically analyzes the time period from the beginning of the uprising until the handshake of Rabin and Arafat on the White House lawn September 13th 1993 Although the theoretical application of the case study is speculative of future environments this paper attempts to link available historical data to anticipated trends in the international security environment and emerging concepts of operational art The argument surrounding asymmetrical types of warfare leads into a discussion of the application of IDF lessons learned that may be applied to future U S military scenarios

Shaping American Military Capabilities after the Cold War Richard Lacquement,2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations

Peacebuilding and Police Reform Espen Barth Eide,Tor Tanke Holm,2013-11-05 The contributions here discuss the issue of internationally assisted police reform in transitions from war to peace They include theoretical insights and informed case studies and a discussion of the trend towards internationally provided executive authority policing

The United Nations and Human Security Edward Newman,2001-10-25 The United Nations and Human Security highlights and analyzes the changing peace and security challenges faced by the United Nations in an evolving international environment that is no longer solely characterized by states and inter state security The authors who comprise both scholars and UN practitioners cover a wide range of pressing current issues including refugees international tribunals the promotion of democracy ethics regional organizations humanitarian intervention conflict prevention and peacekeeping that form a cutting edge and controversial security agenda

Wiki at War James Jay Carafano,2012 In Wiki at War James Jay Carafano explains why these and other Internet born initiatives matter and how they are likely to affect the future face of war diplomacy and domestic politics

Peacebuilding And Police Refor Tor Tanke Holm,2012-10-12 Reforms of local police forces in conflict or post conflict areas need to be

dealt with in order to create a certain level of security for the local people This volume presents the discussions of professionals in the field of peacekeeping civilian police activities and police reform both academics and practitioners on the issue of internationally assisted police reform in transitions from war to peace Contributions include theoretical insights and informed case studies from El Salvador and Guatemala the Balkans West Bank and Gaza and Mozambique and South Africa

Weapons of Mass Destruction Eric A. Croddy, James J. Wirtz, Jeffrey A. Larsen, 2004-12-22 The first accessible reference to cover the history context current issues and key concepts surrounding biological chemical and nuclear weapons A collection of information on everything from aerosols to zones of peace these two volumes cover historical background technology and strategic implications of biological chemical and nuclear weapons thus providing facts terms and context needed to participate in contemporary policy debate This encyclopedia is the only comprehensive reference dedicated to the three types of weapons of mass destruction With over 500 entries arranged alphabetically volume one covers biological and chemical weapons while volume two focuses on nuclear weapons Experts from eight countries cover issues related to these weapons policies strategies technologies delivery vehicles arms control concepts treaties and key historical figures and locations Entries are written to make difficult concepts easy to understand by cutting through military and scientific jargon Students lay readers scientists and government policy makers are provided with the broad range of information needed to place today's policy discussions in proper strategic or historical context
