has been to assemble powerful statements from international authorities that encapsulate leading edge thinking on a group of interconnected themes based on the notion of developing successful leadership in and beyond schools. In so doing the text examines strategies for existing leaders developing their full capacity as well as enhancing the skills of those new to or aspiring to a leadership role. The chapters contributed by a carefully selected group of leading educationalists present insights on a number of central themes including developing new skill sets in leadership, the ethical and moral dimensions of leading an organisation, Leadership for instructional and pedagogical success, developing leadership capacity and capability through strategic activity. Rather than taking a technical approach of how to undertake the managerial or administrative tasks, the authors seek instead to develop critical leadership perspectives and skills with chapters on vitally important topics such as strategies for maximizing the potential of the leadership team as a whole. They draw not only upon the literature in the field of educational leadership but also a wider literature in the field of business and management. This diversity of perspective ensures this book's appeal to a broad international readership.

Leading the Strategically Focused School

Brent Davies, 2006-03-15 One of the great things about Brent Davies' books is that they combine rigorous research with practical reality. *Leading the Strategically Focused School* is no exception. Indeed in this text Brent has surpassed himself in drawing on the two decades of research underpinning his concept of Strategic Leadership and then relating it to the current perceptions of school leaders. The result is a book that resonates with common sense but that is disciplined by the insight of someone in command of his field. This is not a book with easy answers; we have too many of those but one that captures the holism of contemporary leadership, makes you think and leads to informed action. Professor David Hopkins, HSBC Chair of International Leadership and formerly Chief Adviser on School Standards to the Secretary of State 2002-2005, Brent Davies is now established as the pre-eminent scholar on strategic leadership in schools. This book contains a balanced critique of the existing literature and breaks new ground in tackling the critical issue of how strategic leadership can be sustained. As in all his work, he draws widely from the experience of successful practitioners and this ensures its credibility and instils confidence in those who are embarking on a career in school leadership. Professor Brian Caldwell, Associate Director, Global International Networking for Educational Transformation and Managing Director, Educational Transformations, Brent Davies tackles the much misunderstood and abused concept of strategy and gets great results. Linking strategy with sustainability, *Leading the Strategically Focused School* is full of wonderful conceptual tools and practical case vignettes. This book is both conceptual and practical and takes all the excuses off the table. An inspiration and invitation to take action for the good of all. Michael Fullan, Ontario Institute for Studies in Education, University of Toronto. I recommend the book to anyone who is or who aspires to be a leader in schools as it makes an important contribution to the thinking required to achieve cohesive strategic approaches to the running of schools based upon sound practical experience. Brian Roberts, Editor, *International Journal of Educational Management*. Strategic leadership is a critical component in the effective development of schools.

Leaders need to consider the now of school improvement and also how to build strategic capability within the school in order to ensure long term success and sustainability Drawing upon research conducted by the National College for School Leadership the book examines how this can be done The book includes chapters on o establishing processes for building whole school involvement o strategic approaches to build capacity in your school o building and sustaining strategic leadership throughout the school o characteristics of strategically focused schools This book is an indispensable read for school leaders who want to focus on bringing sustainable improvement to their school Strategy Journeys David Booth,2016-09-14 Strategy Journeys starts from the premise that strategic planning suffers from a bad press it can be seen as complex technical remote from the day to day reality of an organisation undertaken by an elite specialist executive group producing threatening changes whose rationale is barely understood or perhaps worse still having no worthwhile impact at all For many senior executives strategic planning is too daunting a task which is why they often seek help from those with the expertise to guide the process they have a severe lack of confidence in their own ability to design plan and implement such an important and major project Yet organisations have never had greater need for a flexible resilient and engaging approach to strategic planning than now How do those leading an organisation know where to start what approach to take and how to go about the process of strategic planning David Booth aims to help them by demystifying the concept and propounding a first principles approach to developing a strategic plan within the context of the individual organisation and with the flexibility to adapt the process to focus on what really matters He suggests the key questions that should be asked when considering embarking on a strategic planning journey to help design and guide the process Performance Management & Measure: The Asian context Human Resources Development Dato' R.
