Strategic Health Planning Methods And Techniques Applied To Marketing Management:

Strategic Health Planning Allen D. Spiegel, Herbert Harvey Hyman, 1991 This book is developed around a rational planning process of six steps required to develop a strategic plan for health services Following an overview chapter that identifies the need for this text and how it differs from previous health planning texts each succeeding chapter is devoted to one step in the process Methods and techniques are provided that can help practitioners carry out the steps Where feasible the reader learns how to use these methods and how to identify their strengths and weaknesses In an era of stiff competition among health service agencies and hospitals practitioners who use the methods described will have a distinct advantage over those administrators who do not In the fast developing and dynamic field of health care past experiences are no longer the best barometer of what a health agency ought to do in the future There is no longer any stability in the health service field Consequently program administrators and or their planning marketing directors do need a guide to insure they obtain better results from their efforts

Health Planning Kathy Eagar, 2020-08-12 This book is destined to become a classic in its field Sidney Sax Chairman Ethics Committee Australian Institute of Health and Welfare former Director of Health Services Planning and Research NSW The whys and hows are clearly and carefully explained for everyone involved in planning health services of all sizes in today's demanding climate No health planner should go to work without this book Tony Adams Professor of Public Health National Centre for Epidemiology and Population Health Australian National University Increasing concern about a positive return on investment in health leads to a need to make choices As a result skills in planning are increasingly being required of managers providers and policy makers in health care Experienced planners and teachers Kathy Eagar Pamela Garrett and Vivian Lin have written a comprehensive introduction that bridges the theory and practice of health planning They outline the health policy and planning context the impact of different resource allocation environments on planning and explain the processes and the technical skills needed to undertake service program corporate business and facility planning The authors also explore major challenges facing health planners including the growing role of market forces in health care the need to balance equity of access with equity of outcomes and the tension between planning for population health versus planning for more efficient health care delivery Illustrated with extensive case studies from both the public and private sectors Health Planning is an indispensable reference for health professionals and a valuable text for students
