Beatty, Lloyd Baird, 1987 **Illusions of Opportunity** Sonia M. Ospina, 2019-01-24 Employees expect organizations to offer an equitable distribution of rewards in promotion compensation and job challenge to those who work hard According to Sonia Ospina the realities of the workplace confound that expectation since organizational practices of labelling and ranking individuals create inequality For this reason Ospina suggests that an appreciation of how employees experience and resolve the contradiction between expectation and reality is prerequisite to understanding work attitudes in contemporary organizations Illusions of Opportunity documents the pervasiveness of this contradiction by focusing on three groups of workers within a large public organization in a major city Exploring individual and collective attempts to make sense of reward distribution Ospina found that each group endorsed a different definition of merit The definitions represented an attempt on the part of each group to justify the claims of its own members to being organizational citizen who deserved recognition Drawing on the research traditions of organizational stratification the social psychology of justice and organizational behavior Ospina operates within a conceptual framework that links objective opportunity structures to employees subjective perceptions of justice Through this merger of the structural and the subjective she provides new insights into the social basis of work attitudes Strategic Human Resource Management Michael Armstrong, 2008 Presenting human resource strategies that have been formulated and developed by practitioners academics and consultants this work demonstrates how these can be implemented in a real world context and in line with business objectives to effect positive and productive change **Strategic Human Resource Management** Gary Rees, Paul Smith, 2014-02-13 Instructors Electronic inspection copies are available or contact your local sales representative for an inspection copy of the print version Containing simple explanations of complex ideas and written in plain English this text has been designed with your needs as a student firmly in mind Whether you are studying at undergraduate or postgraduate level our team of expert

Managing Human Resources Alan B. Clardy, 2014-02-25 Students taking a personnel or human resources management course often do not enter the course bursting with curiosity or unbridled enthusiasm After all what kind of excitement can there be in studying how to process payroll check employment references or learn about some arcane government regulation It is unfortunate and ultimately self defeating if such a mindset about human resources persists because in today's business world organizational success and competitive advantage come from the people side of the business a workforce that is highly competent and committed to the success of the organization The key for students in this field is to learn how to use human resources management HRM to achieve this advantage It is important for students to learn to identify develop and manipulate policies and programs to produce desired outcomes A wide range of critical HRM experiences are presented in this book as either exercises applications or experiments all designed to help students see the choices available and experience their implications in managing the organization They also offer examples of how HRM function must operate within a framework of rules and regulations More specifically this book contains over 30 different situations that illustrate both classic and contemporary human resources problems It covers the entire spectrum of HRM from establishing policies and goals through job analysis and evaluation personnel planning selection and appraisal to compensation and benefits training organizational improvement and safety and labor relations Most of the situations described are drawn from the real

life experiences of managing human resources including several cases from today's headlines. The case exercises applications and experiments are designed to be used as part of regular classroom instruction and can be used with any textbook. The exercises incorporate a number of different learning processes including case discussions, self-assessments, interviews of others, data analysis, team teaching, testing, experimental observation, program creation and design, role playing, exercise simulations, training and participation in experiments. The teacher can use these experiential learning activities to supplement regular classroom instruction; the activities clarify, crystallize and expand the understanding gained from the lectures. Of special interest, all of the exercises can be conducted during class times or can be used as homework assignments. The instructor's manual is organized for easy use with a summary of each case, guidelines for administering each case plus supplemental or background information. An exercise planning table links each exercise with the chapters found in a number of the most commonly used HRM textbooks. Most of the cases are based on actual events drawn from the author's professional or consulting experience or from events first reported in the national media. Each case is intended to replicate and carry a high degree of fidelity to real world conditions as fully as possible. The experiments in the book are intended to serve as both discovery processes and illustrations of the procedures and rules invoked in developing human resources systems. In many of these experiments, students draw on their own background and perspectives to test out various points of view. The experiments illustrate some of the underlying research that often serves as the basis for HRM policies and procedures.

Strategic Human Resource Management Rajib Lochan Dhar, 2008. Strategic HRM has gained much attention and has become a topic of global discussion. Throughout the world, aligning the human resource with the need of the business has been the topic of discussion since quite some time. Looking into this aspect, Strategic HRM has been introduced as a subject in most of the management institutes, more specifically in India. Keeping all these factors in view, the present book has been developed by the author considering the different aspects of Strategic HRM. The book aims to fulfill not only the need of MBA and MPM course but also for the practitioners as a reference manual to successful implementation of Strategic HRM in their organisations. This book has been divided into eleven chapters.
