Taking Learning To Task:

Taking Learning to Task Jane Vella, 2000-07-25 Reading this wonderful book is like having Jane Vella at your side. She gives us the courage to risk changing our established habits of teaching. Clifford Baden, director of programs for professional education, Harvard University. By marrying theory and practice, Vella has shown how to design learning that takes hold of the learner's mind, heart, and muscles. Jack McCall, professor, Principals Executive Program, University of North Carolina, Chapel Hill. You'll feel as though you've found the keys to creating profound and powerfully effective learning experiences. Anyone responsible for engaging a group of adults in learning will find this book invaluable. Rod Brooks, vice president for administration, EXPLORIS. Known for her work in popular education and her worldwide teaching experience, Jane Vella has significantly changed the way we view adult learning. In her three bestselling books, *Learning to Listen*, *Learning to Teach*, *Training Through Dialogue*, and *How Do They Know They Know*, she writes with one basic assumption: that learning is most effective when teachers involve their students in the learning process. In *Taking Learning to Task*, Vella shifts the spotlight from teaching tasks to learning tasks. Unlike traditional teaching methods, learning tasks are open questions leading to open dialogue between teacher and learner. To illustrate this unique approach, Vella provides seven steps to planning learning-centered courses, four types of learning tasks, a checklist of principles and practices, critical questions for instructional design, key components for evaluation, and other tools. She also shares real-world examples of successful learning programs, including online and distance learning courses. *Taking Learning to Task* is a hands-on, practical guide to designing effective learning tasks for diverse learners and diverse content. Teachers, trainers, and all types of instructors will find a wealth of advice for refining their day-to-day practice.

A Practical Approach to Supporting Science and Engineering Students with Self-Regulated Learning Erin E. Peters-Burton, 2023-11-16 Science and engineering practices tend to be more difficult to teach and monitor for student progress than content knowledge because practices are skill-based. This book presents tangible ways for teacher educators and teachers to design learning environments that involve student goal setting, monitoring, and reflection on their performance of science and engineering practices. It models ways teachers can support effective learning behaviors and monitor student progress in science and engineering practices. It also presents practical ways to set up preservice teacher instruction and inservice teacher professional development that address both self-regulated learning and science and engineering practices. Educational research designs are presented from qualitative, quantitative, and mixed methods traditions that investigate student and teacher engagement with science and engineering practices through self-regulated learning.

On Teaching and Learning Jane Vella, 2014-07-17 *On Teaching and Learning* takes the ideas explored in renowned educator Jane Vella's best-selling book *Learning to Listen, Learning to Teach* to the next level and explores how dialogue education has been applied in educational settings around the world. Throughout the book, she shows how to put the principles and practices of dialogue education into action and uses illustrative stories and examples from her

extensive travels Dialogue education values inquiry integrity and commitment to equity values that are also central to democracy Learners are treated as beings worthy of respect recognized for the knowledge and experience they bring to the learning experience Dialogue education emphasizes the importance of safety and belonging It is an approach that welcomes one's certainties and one's questions

The Learning Cycle Muriel I. Elmer, Duane H. Elmer, 2020-04-21 With insights from neuroscience educational psychology and learning theory veteran educators Muriel and Duane Elmer provide a holistic model for how learning takes place Their learning cycle moves beyond mere recall of information to helping learners value and apply their learning in ways that are integrated into behavior and practice

Metacognition and Its Interactions with Cognition, Affect, Physicality and Off-Task Thought Luke Carson, 2021-03-15 What happens when teachers are removed from the equation when we learn by ourselves or with peers Increasingly rapid change is part of our world today and tomorrow The need to learn and to adapt is now lifelong and ubiquitous But are educators and educational institutions preparing today's students for this reality Educators and institutions choose pedagogic models design curricula and provide instruction However this does not mirror the learning environments that we inhabit outside of formal education nor does it reflect all our learning time during formal education This text provides a data driven picture of the independent learning experience what occurs in the minds of learners as they negotiate learning tasks without or with less guidance and instruction Cognition distraction embodied experience emotion and metacognition are central to this learning Drawing on new empirical data this volume focuses on university aged learners These are the learners who have been through our formal educational systems Do they learn well in independent settings Have they been prepared for this Through an explication of this experience this volume makes a case for how we can better prepare them for the demands of current and future learning

Educating for Democracy Rolf Gollob, Peter Krapf, Wiltrud Weidinger, Ólöf Ólafsdóttir, 2010-01-01 The objective of this manual is to support teachers and practitioners in Education for Democratic Citizenship and Human Rights Education EDC HRE It addresses key questions about EDC and HRE including competences for democratic citizenship the objectives and basic principles of EDC HRE and a whole school approach to education for democracy and human rights The manual consists of three parts Part I outlines the basic principles of EDC HRE as far as they are helpful and meaningful for the practitioner Part II gives guidelines and tools to design support and assess the students' processes of constructivist and interactive learning Part III provides toolboxes for teachers and students in EDC HRE The other volumes in this series offer concrete teaching models and materials in EDC HRE for pupils from elementary to upper secondary level

Rule Extraction from Support Vector Machines Joachim Diederich, 2008-01-04 Support vector machines SVMs are one of the most active research areas in machine learning SVMs

have shown good performance in a number of applications including text and image classification. However, the learning capability of SVMs comes at a cost: an inherent inability to explain in a comprehensible form the process by which a learning result was reached. Hence, the situation is similar to neural networks where the apparent lack of an explanation capability has led to various approaches aiming at extracting symbolic rules from neural networks. For SVMs to gain a wider degree of acceptance in fields such as medical diagnosis and security sensitive areas, it is desirable to offer an explanation capability. User explanation is often a legal requirement because it is necessary to explain how a decision was reached or why it was made. This book provides an overview of the field and introduces a number of different approaches to extracting rules from support vector machines developed by key researchers. In addition, successful applications are outlined and future research opportunities are discussed. The book is an important reference for researchers and graduate students and, since it provides an introduction to the topic, it will be important in the classroom as well. Because of the significance of both SVMs and user explanation, the book is of relevance to data mining practitioners and data analysts.

Innovative Approaches to

Religious Education Bernhard Grümme, Manfred L. Pirner, 2025-07-16 A superb collection of contemporary research on German language religious education. Professor Julian Stern, Bishop Grosseteste University, Lincoln, UK. Although specific contexts differ between and within countries, the issues and challenges regarding religious education in schools are essentially the same worldwide. It is therefore very valuable and relevant that this volume makes the rich insights and approaches to religious education developed and brought together by German scholars available to a wider audience. Professor Gerdien Bertram, Troost Vrije Universiteit, Amsterdam, The Netherlands. This volume can function as a toolkit for teachers aiming to equip the younger generations with skills and competences needed in navigating their paths to good life. Professor Arniika Kuusisto, Faculty of Educational Sciences, University of Helsinki, Finland. These reflections speak directly to the difficulties of teaching religious education both in Germany and internationally. Professor Robyn Horner, School of Theology, Australian Catholic University.
