expressing their gratitude for his ability to cure illnesses that had plagued them for years But Perdomo also had his detractors Physicians formally trained *medicos* and those who supported scientific modernization were critical of Perdomo's practice of Hispanic medicine even though it was part of the medical system of the day Blending Catholic healing beliefs with indigenous and African medical ideologies Hispanic medicine challenged the innovations occurring in the professional medical community This volume also makes a singular contribution to a scholarly understanding of the emergence of medical pluralism tracking the submergence of traditional medicine by the institutionalization of scientific medicine In its investigation of the history of nineteenth century medical history it explores a sparsely researched historical terrain Moreover it examines popular healing ideologies and practices topics that are seldom discussed in the context of nineteenth century medical history

Pushing in Silence Isabel M. Córdova, 2017-12-20 As Puerto Rico rapidly industrialized from the late 1940s until the 1970s the social political and economic landscape changed profoundly In the realm of health care the development of medical education new medical technologies and a new faith in science radically redefined childbirth and its practice What had traditionally been a home based family oriented process assisted by women and midwives and accomplished by mothers became a medicalized hospital based procedure accomplished and directed by biomedical predominantly male practitioners and ultimately reconfigured after the 1980s into a technocratic model of childbirth driven by doctors fears of malpractice suits and hospitals corporate concerns *Pushing in Silence* charts the medicalization of childbirth in Puerto Rico and demonstrates how biomedicine is culturally constructed within regional and historical contexts Prior to 1950 registered midwives on the island outnumbered registered doctors by two to one and they attended well over half of all deliveries Isabel M Córdova traces how over the next quarter century midwifery almost completely disappeared as state programs led by scientifically trained experts and organized by bureaucratic institutions restructured and formalized birthing practices Only after cesarean rates skyrocketed in the 1980s and 1990s did midwifery make a modest return through the practices of five newly trained midwives This history which mirrors similar patterns in the United States and elsewhere adds an important new chapter to the development of medicine and technology in Latin America

Medicine and Politics in Colonial Peru Adam Warren, 2010-10-24 By the end of the eighteenth century Peru had witnessed the decline of its once thriving silver industry and had barely begun to recover from massive population losses due to smallpox and other diseases At the time it was widely believed that economic salvation was contingent upon increasing the labor force and maintaining as many healthy workers as possible In Medicine and Politics in Colonial Peru Adam Warren presents a groundbreaking study of the primacy placed on medical care to generate population growth during this era The Bourbon reforms of the eighteenth century shaped many of

the political economic and social interests of Spain and its colonies In Peru local elites saw the reforms as an opportunity to positively transform society and its conceptions of medicine and medical institutions in the name of the Crown Creole physicians in particular took advantage of Bourbon reforms to wrest control of medical treatment away from the Catholic Church establish their own medical expertise and create a new secular medical culture They asserted their new influence by treating smallpox and leprosy by reforming medical education and by introducing hygienic routines into local funeral rites among other practices Later during the early years of independence government officials began to usurp the power of physicians and shifted control of medical care back to the church Creole doctors without the support of the empire lost much of their influence and medical reforms ground to a halt As Warren s study reveals despite falling in and out of political favor Bourbon reforms and creole physicians were instrumental to the founding of modern medicine in Peru and their influence can still be felt today

Making Medicines in Early Colonial Lima, Peru Linda A. Newson, 2017-09-18 Based on extensive archival research in Peru Spain and Italy Making Medicines in Early Colonial Lima Peru examines how apothecaries in Lima were trained ran their businesses traded medicinal products prepared medicines and found their place in society In the book Newson argues that apothecaries had the potential to be innovators in science especially in the New World where they encountered new environments and diverse healing traditions However it shows that despite experimental tendencies among some apothecaries they generally adhered to traditional humoral practices and imported materia medica from Spain rather than adopt native plants or exploit the region s rich mineral resources This adherence was not due to state regulation but reflected the entrenchment of humoral beliefs in popular thought and their promotion by the Church and Inquisition
