The Universal Cambist, and Commercial Instructor Patrick Kelly, 1811 Gold Mary Hill, 2000-02-28 The discovery of gold in 1848 catapulted California into statehood and triggered environmental, social, political, and economic events whose repercussions are still felt today. Mary Hill combines her scientific training with a flair for storytelling to present the history of gold in California from the distant geological past through the wild days of the Gold Rush to the present. The early days of gold fever drew would-be miners from around the world, many enduring great hardships to reach California. Once here, they found mining to be backbreaking work and devised machines to help recover gold. These machines pawed gravel from river bottoms and tore apart mountainsides, wreaking environmental havoc that silted rivers, ruined farmlands, and provoked the world's first environmental conflict settled in the courts. Native Americans were nearly wiped out by invading miners or their diseases, and many Spanish-speaking settlers, Californios, were pushed aside. Hill writes of gold's uses in today's world for everything from coins to coffins, gourmet foods to spacecraft. Her comprehensive overview of gold's impact on California includes illustrated explanations of geology and mining in nontechnical language as well as numerous illustrations, maps, and photographs.

The protagonists, drawn by the promise of financial success, encounter many obstacles and tribulations along the way, including perilous terrain, cunning robbers, and the harsh realities of gold mining. In the middle of the turmoil and rivalry, relationships are formed, love is found, and the quest for fortune is put to the test. The Cave of Gold gives a realistic picture of the harsh and turbulent reality of California at this pivotal period in history via vivid descriptions and engrossing storytelling.
