1933-1945 Alan R. Rushton, 2019-01-17 When Hitler came to power in 1933 he labeled physically and mentally handicapped citizens as dangerous to the genetic health of the German people He initiated a compulsory sterilization program that eventually blocked 400 000 citizens from enjoying any normal family life With the onset of war in 1939 he decided that resources should be reserved for healthy worthwhile citizens who could work for victory He then ordered a secret program to kill the handicapped Approximately 250 000 citizens had died when the war finally ended Readers in medicine law sociology and history will be intrigued by this compelling story of the brave citizens who spoke out against the immoral killing of the disabled Many were arrested and imprisoned some were executed All the protesters claimed that the disabled were not ballast people They were people who deserved opportunities to contribute what they could for the good of the community

Reclaiming the Disabled Subject, 2022-04-20 Mired inside its rather archaic comprehension as a medical phenomenon disability for a long time now has been ignored as a marker of identity The world has only been busy in rectifying the absences that have ostensibly disabled rather than accepting such impaired existences as human beings themselves The volume intends to reclaim the representations of disability and present narratives that do not just use the figure of the disabled as a means to an end It includes translation of 17 disability centric short stories from multiple Indian languages into English Further it uses these stories as illustration to test and develop new theoretical formulations concerning disability and the disabled What grants the proposed work its uniqueness is in other words not only the translations of the erstwhile lost stories of disability but also the use of these stories towards the formation of theoretical paradigms to move forward the project of Disability Studies The volume shows interrogates and problematizes the affect that impairment and disability has on those who are abled It presents how the normal human being approaches the disabled and interacts with them All in all owing to its academic engagement with disability as a phenomenon and within a narrative this work intends to take the role of a resource book that will find ready use in the newly emergent multidisciplinary field of Disability Studies and will be of

great significance to India and the world at large especially since Literature has a major role to play in this field Not only then does it present different disability narratives to the world but through their academic interrogation also allows researchers and academics especially in India to form the theoretical enhancements in Disability Studies that both our country and the world desperately require *The Disability Studies Reader* Lennard J.
