The Health Care Facility Locator:

Decision Support System for the Location of Healthcare Facilities Marta Dell'Ovo, Alessandra Oppio, Stefano Capolongo, 2020-08-19 The book examines an integrated approach for addressing decisions about the location of healthcare facilities Supported by Geographic Information Systems GIS and Multi Criteria Decision Analysis MCDA the approach provides comprehensive information on territory taking into account the spatial dimensions Due to the multiple criteria involved site selection for urban facilities is a crucial topic in planning decision processes especially for healthcare facilities Healthcare provision policies generally fail to address the distribution of facilities within cities entrusting decisions to various stakeholders Moreover current evaluation tools focus on the intrinsic performances of healthcare structures disregarding the extrinsic characteristics namely those related to the location Starting with a cross disciplinary literature review the book describes a multi methodological approach for decision making regarding the location of healthcare facilities and presents an innovative evaluation tool that simultaneously considers functional locational environmental and economic issues providing a comprehensive overview of the areas under investigation

Facility Location Zvi Drezner, Horst W. Hamacher, 2004-05-03 The book covers both theory and applications of locational analysis LocAn The reader will see the power of LocAn models in various real world contexts varying from communication design to robotics and mail delivery It is divided into two parts The first part contains an overview of some of the LocAn methodologies The second part describes in thorough detail some selected applications The text provides researchers with an excellent and well thought out review of available location models

Operations Research and Health Care Margaret L. Brandeau, Francois Sainfort, William P. Pierskalla, 2006-04-04 In both rich and poor nations public resources for health care are inadequate to meet demand Policy makers and health care providers must determine how to provide the most effective health care to citizens using the limited resources that are available This chapter describes current and future challenges in the delivery of health care and outlines the role that operations research OR models can play in helping to solve those problems The chapter concludes with an overview of this book its intended audience the areas covered and a description of the subsequent chapters

KEY WORDS Health care delivery Health care planning HEALTH CARE DELIVERY PROBLEMS AND CHALLENGES 3 1 1 WORLDWIDE HEALTH THE PAST 50 YEARS Human health has improved significantly in the last 50 years In 1950 global life expectancy was 46 years 1 That figure rose to 61 years by 1980 and to 67 years by 1998 2 Much of these gains occurred in low and middle income countries and were due in large part to improved nutrition and sanitation medical innovations and improvements in public health infrastructure

Decision Making in Healthcare Systems Tofigh Allahviranloo, Farhad Hosseinzadeh Lotfi, Zohreh Moghaddas, Mohsen Vaez-Ghasemi, 2023-12-31 This book chooses the topic which is due to the editors experience in modeling projects in healthcare systems Also the transfer of experiences is the reason why mathematical modeling and decision making in the field of health are not given much attention To this end the new aspect of this book is the lack of

reference needed to carry out projects in the field of health for researchers whose main expertise is not modeling Students of health mathematics management and industrial engineering fields are in the direct readership with this book Different projects in the field of healthcare systems can use the topics presented in different chapters mentioned in this book

Facility Location Reza Zanjirani Farahani, Masoud Hekmatfar, 2009-07-09 Location problems establish a set of facilities resources to minimize the cost of satisfying a set of demands customers with respect to a set of constraints This book deals with location problems It considers the relationship between location problems and other areas such as supply chains

Engineering the System of Healthcare Delivery William B. Rouse, Denis A. Cortese, 2010 As the United States continues to debate reform of its healthcare system this book argues that providing health insurance for all without improving the delivery system will not improve the current problems of access affordability and quality The US healthcare system has many excellent components strong scientific input extraordinary technology for diagnosis and treatment dedicated staff and top class facilities among them But the system has evolved haphazardly over time and although it has not failed entirely the authors argue that like any system where attention is paid to individual components at the expense of the system as a whole it can never hope to succeed Above all they point out that the US system does not provide high value healthcare it has the highest costs in the world and yet many other countries have lower infant mortality rates and better life expectancy Together with a team of highly regarded thought leaders the authors of this publication advocate a complete re thinking of healthcare from a systems perspective an engineering approach to healthcare and they then describe how to set about it Covering a wide range of subjects including health care costs and economics barriers to change integrated health systems electronic records and computer based patient support as well as patient safety and palliative and chronic care this book will be of interest to all those involved in healthcare provision whose goal is affordable care to promote healthy high quality lives
