Education in Nineteenth-Century British Literature Sheila Cordner, 2016-04-20 Sheila Cordner traces a tradition of

literary resistance to dominant pedagogies in nineteenth century Britain recovering an overlooked chapter in the history of thought about education This book considers an influential group of writers all excluded from Oxford and Cambridge because of their class or gender who argue extensively for the value of learning outside of schools altogether From just beyond the walls of elite universities Jane Austen Elizabeth Barrett Browning Thomas Hardy and George Gissing used their position as outsiders as well as their intimate knowledge of British universities through brothers fathers and friends to satirize rote learning in schools for the working classes as well as the education offered by elite colleges Cordner analyzes how predominant educational rhetoric intended to celebrate England s progress while simultaneously controlling the spread of knowledge to the masses gets recast not only by the four primary authors in this book but also by insiders of universities who fault schools for their emphasis on memorization Drawing upon working men s club reports student guides educational pamphlets and materials from the National Home Reading Union as well as recent work on nineteenth century theories of reading Cordner unveils a broader cultural movement that embraced the freedom of learning on one s own Literature a series of anthologies E. A. Cross,1945 *The Student's Manual of English Literature. A History of English Literature. ... A New Edition Of "Outlines of English Literature" , Enlarged and Rewritten. Edited, with Notes and Illustrations, by W. Smith* Thomas Budd SHAW,1867 *British Literature and Technology, 1600-1830* Kristin M. Girtten,Aaron R. Hanlon,2023-01-13 Enlightenment era writers had not yet come to take technology for granted but nonetheless were as we are today both attracted to and repelled by its potential This volume registers the deep history of such ambivalence examining technology s influence on Enlightenment British literature as well as the impact of literature on conceptions of attitudes toward and implementations of technology Offering a counterbalance to the abundance of studies on literature and science in seventeenth and eighteenth century Britain this volume s focus encompasses approaches to literary history that help us understand technologies like the steam engine and the telegraph along with representations of technology in literature such as the political machine Contributors ultimately show how literature across genres provided important sites for Enlightenment readers to recognize themselves as chimeras hybrids of machine and organism and to explore the modern self as a creature of social reality as well as a creature of fiction *Biographical and Critical History of the British Literature of the Last Fifty Years* Allan Cunningham,2019-08-17 This is a reproduction of the original artefact Generally these books are created from careful scans of the original This allows us to preserve the book accurately and present it in the way the author intended Since the original versions are generally quite old there may occasionally be certain imperfections within these reproductions We re happy to make these classics available again for future generations to enjoy **ENGLISH LITERATURE ADVANCING THROUGH HISTORY 4 - The Eighteenth Century** Petru Golban,2022-12-28 It appears that literary work possesses eternal temporal validity due to its autonomous aesthetic value whereas criticism provides points of view having temporary and transitory significance Despite such claims the vector of methodology in our series of books

dealing with the history of English literature relies on Viktor Shklovsky T S Eliot Mikhail Bakhtin and especially Yuri Tynyanov whose main reasoning would be that literature is a system of dominant central and peripheral marginalized elements to us tradition centre versus innovation margin engaged in a battle for supremacy demarginalization and the right to form a new literary system and the development or historical advancement of literature is the substitution of systems Roman Jakobson and French structuralism on the whole later Linda Hutcheon with her system and constant and Bran Nicol with the dominant to say nothing about Itamar Even Zohar and his theory of polysystem to a certain extent Julia Kristeva and even Homi Bhabha as well as our humble contribution we would like to believe maintain Tynyanov's line of thinking and concepts alive which have developed and emerged nowadays more like a kind of neo formalism Focusing on literary practice applying critical theory and emerging from within our own teaching experience the books in the present series are theoretical and surveyistic like a monograph whereas their more practical and text oriented aspect should appeal as a student handbook for didactic purposes in which certain literary works belonging to various writers of different trends movements and periods are analysed and compared with regard to their source form thematic arrangements ideas motifs character representation strategies intertextual perspectives structural or narrative techniques and other aspects

A History of English Literature Alastair Fowler, 1987 This delightful introduction to English literature engaging readable and wise is enlivened by the opinions and pleasures of a fine scholar critic Historically it ranges from the Middle Ages to the present concentrating on British writing but glancing also at selected American and Commonwealth authors and lingering over the works of key figures such as Chaucer Spenser Milton and Dickens
