Latin America Juan Manuel Pérez,2004 This is a general bibliography

on Latin America covering a wide variety of subjects from pre Columbian civilizations to Columbus to Castro to the foreign debt to pollution ect This work will not only be of use to the general casual reader on Latin America but also to the more specialized researcher The book contains over 800 topics with over 8 000 titles identified *RIB* ,1983 **American Doctoral Dissertations** ,1989 **Geographical Change and the Law of the Sea** Kate Purcell,2019-12-19 This book examines the implications of geographical change for maritime jurisdiction under the law of the sea In a multistranded intervention it challenges existing accounts of the consequences of climate related change for entitlement to maritime space maritime limits and international maritime boundaries It also casts new light on the question of whether a loss of habitable land and large scale population displacement will precipitate a loss of territorial sovereignty and the legal extinction of affected States This study of the legal significance of geographical change is grounded in an in depth study of the role of geography in the law of the sea As well as offering a new perspective on the pressing question of how climate change will affect maritime jurisdiction territorial sovereignty and statehood the book contributes to the scholarship on maritime delimitation and international boundaries generally on land and at sea It includes an analysis of the principle of intertemporal law that suggests a useful framework for considering questions of stability and change in international law more broadly This rigorous and original study will be of value to anyone concerned with the implications of climate related change for maritime jurisdiction territorial sovereignty and statehood Its broader analysis of the existing law and engagement with a range of doctrinal debates through the lens of the question of geographical change will be of interest to scholars and practitioners of the law of the sea the law of territory and the law relating to international boundaries Report of Robert C.
