regime change It did so by doing away with the norm in historical societies sacral monarchy and by consolidating the two great balancing acts European state builders have been engaged in since the eleventh century against strong social groups and against each other The book traces the roots of this crisis to a large scale breakdown of public authority in the Latin West which began in the ninth century and which at one and the same time incentivised and permitted a religious reform movement to radically transform the Catholic Church in the period from the late tenth century onwards Drawing on a unique dataset of towns parliaments and ecclesiastical institutions such as bishoprics and monasteries the book documents how this church reform movement was crucial for the development and spread of self government the internal balancing act and the weakening of the Holy Roman Empire the external balancing act in the period AD 1000 1500 *The Wine Trade in Medieval Europe 1000-1500* Susan Rose, 2011-06-23 Wine has held its place for centuries at the heart of social and cultural life in western Europe This book explains how and why this came about providing a thematic history of wine and the wine trade in Europe in the middle ages from c 1000 to c 1500 Wine was one of the earliest commodities to be traded across the whole of western Europe Because of its commercial importance more is probably known about the way viticulture was undertaken and wine itself was made than the farming methods used with most other agricultural products at the time Susan Rose addresses questions such as Where were vines grown at this time How was wine made and stored Were there acknowledged distinctions in quality How did traders operate What were the social customs associated with wine drinking What view was taken by moralists How important was its association with Christian ritual Did Islamic prohibitions on alcohol affect the wine trade What other functions did wine have
