Talvitie, 2018-05-15 The perennial interest in psychoanalysis shows no signs of abating and the longevity of psychoanalytic theory is seen in the varied extensions and elaborations of Freudian thinking in the fields of neuroscience and cognitive theory Nevertheless the scientific standing of psychoanalysis has long been questioned and developments in the fields of the philosophy of science and psychology require a fresh assessment of the scientific standing of psychoanalysis While there are a range of views on the topic of whether psychoanalysis is in fact scientific any satisfactory approach to understanding mind and behaviour requires an approach that is at once both philosophic and scientific Accordingly to even approach the question

regarding the scientific nature of psychoanalysis a foundation comprising a sophisticated conceptual and philosophical framework is required This volume represents the junction where philosophy science and psychoanalysis meet and presents arguments critical and supportive of the scientific standing of psychoanalysis

Halina Brunning, Mario Perini, 2018-05-08 This article is intended to contribute to our understanding of the December 2001 collapse of Enron The existing literature on Enron s demise falls largely into two broad areas involving either micro psychological explanations or macro accounts that emphasize the workplace and its environment this paper is an exploratory study that focuses on a new interpretation which links the two areas more closely together It is proposed that Enron s culture was influenced by both micro and macro factors an experience of unsuccessful paternal authority figures within the family history of Enron s leaders coupled with an experience of problematic government and regulatory regimes associated with the gas industry Drawing on concepts from psychoanalysis and its application to organizational dynamics it is argued that these micro and macro factors helped to generate an Oedipal mindset in Enron s leaders according to which external authority was seen to be weak and not worthy of respect and that this contributed to Enron s demise Implications for theory are examined

Memory, Narrative and Forgiveness Pumla Gobodo-Madikizela, Chris N van der Merwe, 2009-03-26 The United Nations declaration of 2009 as the International Year of Reconciliation is testimony to the growing use of historical commissions as instruments of reconciliation in post conflict societies Since the South African Truth and Reconciliation Commission TRC has had a profound impact on international efforts to deal with the aftermath of mass violence and societal conflict this is an appropriate time for scholars to debate and reflect on the work of the TRC and the wide ranging scholarship it has inspired across disciplines With a foreword by Harvard Law Professor Martha Minow *Memory Narrative and Forgiveness Perspectives on the Unfinished Journeys of the Past* offers readers a front row seat where a team of scholars draw on both theoretical analysis and case studies from around the world to explore the themes of memory narrative forgiveness and apology and how these themes often interact in either mutually supportive or unsettling ways The book is a vibrant discussion by scholars in philosophy psychology psychoanalytic theory history literary theory and Holocaust studies The authors explore the complex interconnected issues of trauma and narrative testimonial and literary narrative and theatre as narrative mourning and the potential of forgiveness to heal the enduring effects of mass trauma and transgenerational trauma memory as a basis for dialogue and reconciliation in divided societies The authors go well beyond the South African

TRC and address a wide range of historical events to explore the possibilities and the challenges that lie on the path of reconciliation and forgiveness between victims perpetrators and bystanders in societies with a history of violent conflict and unspeakable injustice The book provides readers with a cohesive theoretically well grounded analysis of the impact of traumatic memories in the personal and communal lives of survivors of trauma It explores how narrative may be creatively applied in processes of healing trauma and how public testimony can often restore the moral balance of societies ravaged by trauma The book deepens understanding of the ways in which lessons from the TRC might be developed and both usefully and cautiously applied in other post conflict situations

intersubjectivity Countertransference Athina Alexandris, Grigoris Vaslamatzis, 2018-03-26 A collection of papers on the Oedipus complex divided into three parts theory practice and supervision The contributors who include Joyce McDougall Hanna Segal Otto Kernberg and Leon Grinberg invite the reader to explore with them the processes affecting the therapist's mind and occasionally his body during psychoanalytic therapy and the reasons why the therapist thinks feels and reacts in a particular way The full significance of these processes referred to as counter transference since Freud's time has recently been recognized resulting in the therapist's use of additional resources so that he or she can understand and help the patient more effectively In the 1950s and 1960s Paula Heimann and Heinrich Racker following on Freud's own observations made important contributions to the study of the countertransference considerably enlarging upon the concept and re evaluating the nature of the psychoanalytic therapeutic relationship as a result **Psychoanalytic Collisions** Joyce

Slochower, 2014-10-24 Psychoanalytic Collisions Second Edition wrestles with a theme that confronts every psychotherapist the gap between illusions and realities about the professional self Joyce Slochower closely examines situations in which the therapist's professional and personal wishes collide with the actuality of everyday clinical work The book unpacks the dynamics of these collisions on both beginning and seasoned therapists offering ways of sustaining a professional ideal while also exploring the mixed impact of that ideal on clinical work In examining how illusions and ideals affect the therapeutic encounter for both better and worse Psychoanalytic Collisions invites the reader into the consulting room This Second Edition has been substantially revised It includes updated clinical and theoretical material as well as a new chapter about mutual idealizations that coalesce between patient and analyst Slochower argues that psychoanalytic collisions can be productively engaged even if they often cannot be fully resolved The very act of engagement whether by establishing new grounds for collaboration in the wake of real world catastrophe wrestling with clinical impasses that arise from the divergent expectations of analyst and patient or owning up to and addressing the analyst's secret delinquencies reveals how therapeutic hopefulness can coexist with an acceptance of the analyst's all too human fallibility Psychoanalytic Collisions shows how idealization is intrinsic both to forging an analytic identity and practicing across a lifetime Slochower's work challenges readers to confront their own vulnerabilities and limits while also embracing a professional ideal that is at once human and inspiring The book is an essential resource for psychoanalysts psychotherapists pastoral counselors and readers interested in the practice of psychotherapy today **Meaning, Mind, and Self-Transformation** Victor L.

Dancing Among the Maenads Kevin Volkan,1994 Although a number of scholars have looked at the phenomenon of compulsive drug use from a psychoanalytic perspective an objects relations approach has not yet been defined Nevertheless it has become increasingly clear that compulsive drug use is related to early object relations pathology This study outlines the major tenets of classical psychoanalytic and object relations theory and practice with regard to the compulsive drug user These theories give a clear understanding of the role drugs play in compensating for the experience of the object It is concluded that individuals with healthy early object relations are not likely to become pathologically compulsive drug users On the other hand those with poor early object relations are at risk for addiction
