Natural Language Processing in Action is your guide to building machines that can read and interpret human language. In it, you'll use readily available Python packages to capture the meaning in text and react accordingly. The book expands traditional NLP approaches to include neural networks, modern deep learning algorithms, and generative techniques as you tackle real-world problems like extracting dates and names, composing text, and answering free-form questions. What's inside:

- Some sentences in this book were written by NLP. Can you guess which ones?
- Working with Keras, TensorFlow, gensim, and scikit-learn
- Rule-based and data-based NLP
- Scalable pipelines

About the Reader: This book requires a basic understanding of deep learning and intermediate Python skills.

About the Author: Hobson Lane, Cole Howard, and Hannes Max Hapke are experienced NLP engineers who use these techniques in production.

[The Oxford Handbook of the Archaeology of the Contemporary World](#) Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social, cultural, and historical circumstances; archaeology is always carried out in the present. More recently, however, many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself: how we might undertake archaeologies of as well as in the present. This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub-field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past. In addition to detailed archaeological case studies, it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world, including anthropology, psychology, philosophy, historical geography, science and technology studies, communications and media, ethnoarchaeology, forensic archaeology, sociology, film, performance, and contemporary art. This volume seeks to explore the boundaries of an emerging

sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively *The Measurement of General Exchange-value* Correa Moylan Walsh,1901 **The**

Whalen,Paul E. Minnis,2001-03 Michael E Whalen and Paul E Minnis have worked extensively in the Casas Grandes area and now offer new research arguing that it was not as similar to the highly developed complex societies of Mesoamerica as has

been thought In the first book of its kind in 25 years the authors analyze settlement pattern data from more than 300 communities in the area surrounding Casas Grandes to show that its Medio period culture was a local development

BOOK JACKET Casas Grandes and Its Hinterlands Michael E. Whalen, Paul E. Minnis, 2001-03-01 Casas Grandes or Paquim is one of the most important settlements in the prehistoric North American Southwest The largest and most complex community in the Puebloan world it was characterized by its principal excavator Charles Di Peso as an outpost of the Toltec empire which used it as a trade link between Mesoamerican and southwestern cultures Michael E Whalen and Paul E Minnis have worked extensively in the Casas Grandes area and now offer new research arguing that it was not as similar to the highly developed complex societies of Mesoamerica as has been thought In the first book of its kind in 25 years the authors analyze settlement pattern data from more than 300 communities in the area surrounding Casas Grandes to show that its Medio period culture was a local development Whalen and Minnis propose that Casas Grandes lacked extensive stratification well established decision making hierarchies and formalized positions of authority They suggest instead that emerging elites used bribes promises and threats to build factions and extend their power The communities at the periphery are shown to have had varying levels of social and economic interaction with Casas Grandes This innovative study offers a new model for the rise and fall of Casas Grandes that departs considerably from the view most scholars have come to accept and will be of interest to all concerned with the comparative study of emergent complexity It clearly shows that the idea of extensive regional centralization by Casas Grandes is no longer tenable and merits reconsideration by the archaeological community
