test score gains Texas and North Carolina rank at or below the national averages on these characteristics and none of them changed during the study period in ways that would explain the gains The study concludes that the most plausible explanation for the score gains is found in the policy environment established in each state Both states pursued similar paths to improvement and each succeeded in changing the organizational environment and incentive structure for educators in ways that led to improvement The keys to this change include 1 creating an aligned system of standards curriculum and assessments 2 holding schools accountable for improvement by all students and 3 support from businesses in developing implementing and sustaining these changes over time Contains 16 figures 4 tables and 18 references Author SLD **The Cumulative Book Index** ,1999 Investing in Early Childhood Development A.
