Economic Impact Issues in Export-Import Bank Reauthorization United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs. Subcommittee on International Trade and Finance, 2007 *Evaluation of the International Finance Corporation's Global Trade Finance Program, 2006-12* The World Bank, 2013-09-04 As part of its strategy to support global trade the World Bank Group seeks to enhance trade finance in emerging markets In 2005 the International Finance Corporation IFC part of the Bank Group introduced the Global Trade Finance Program GTFP to support the extension of trade finance to underserved clients globally This IEG evaluation found that overall the GTFP was a relevant response to the demand to reduce risk in trade finance in emerging markets The program significantly improved IFC's engagement in trade finance by introducing an open network of banks and a quick flexible response platform to support the supply of trade finance IEG's evaluation covers the program's operations from its inception in 2005 through FY2012 The program grew from a 500 million annual commitment to 5 billion in FY12 It accounted for 39 percent of total IFC commitments and has low costs it accounted for 2.4 percent of IFC's capital use and 1.2 percent of its staff costs and has had no claims to date It is profitable as well although not to the extent originally expected accounting for 0.6 percent of IFC's net profit IEG found that the GTFP has particular additionality among higher risk countries In its early years it was concentrated in these countries particularly in Africa During the global crisis the program risk mitigation instrument became relevant in much broader markets Client feedback on the program has been positive In its evaluation IEG does offer several recommendations to enhance its effectiveness including on issues of transparency and reporting methods as well as expanding the share of the program in needier markets For development professionals the lessons in this evaluation can be applied to private sector development situations particularly mitigation of financing risks in emerging markets **Germany** International Monetary Fund, 2011-12-23 As part of the 2011 Financial Sector Assessment Program FSAP update for Germany this Technical Note reviews recent developments of mortgage covered bond Pfandbrief and mortgage securitization markets in Germany and explores future prospects for each against the background of ongoing regulatory changes It examines the characteristics of the two markets and their performance through the crisis and analyzes some of the policy reactions that are currently tending to favor covered bonds over securitization Some of the systemic vulnerabilities associated with covered bonds are also discussed **The Reauthorization of the Export-Import Bank** United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 2009 Euro Area Policies International Monetary Fund. European Dept., 2014-07-14 This 2014 Article IV Consultation highlights that the euro area recovery is taking hold Real output has expanded for four consecutive quarters and financial market sentiment has improved markedly Complementary policy actions have supported demand boosted investor confidence and eased financial conditions At the national level governments have made further progress repairing sovereign and bank balance sheets and implementing structure reforms to restore competitiveness At the

area wide level the ECB has taken a wider range of measures to support demand and address fragmentation Over the medium term there is a risk of stagnation which could result from persistently depressed domestic demand owing to deleveraging insufficient policy action and stalled structural reforms *Reauthorization of the Export-Import Bank of the United States* United States. Congress. House. Committee on Financial Services. Subcommittee on Domestic and International Monetary Policy, Trade, and Technology,2006 Integrating SMEs into Global Value Chains

ADBI,ADB,2016-03-08 Globalized production networks or global value chains provide an opportunity for SMEs to upscale their business models and to grow across borders This process can enhance SME competitiveness create more jobs and promote inclusive growth in developing Asia The Asian Development Bank ADB and the ADB Institute ADBI recognize the importance of integrating SMEs into global value chains To provide pathways for such integration this study examines ways of encouraging participation in value chains and explores policy solutions to address the financial and nonfinancial barriers faced by these enterprises **Secured Transactions Law Reform in Africa** Marek Dubovec,Louise Gullifer,2019-10-31

Over the last few decades many countries have reformed their secured transactions law One of the main reasons has been the clear link between reform and the availability of credit and the drive to improve access to finance particularly for micro small and medium sized enterprises This book focuses particularly on developing economies in Africa which have legal frameworks influenced by English French Belgian Roman Dutch and other laws Reform in this area of law across African countries has taken a number of forms which are explored and discussed in this book Secured Transactions Law Reform in Africa is a mixture of a critical description of the pre reform law and practice and the reform process itself It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms The book sets out a road map for the future of secured transactions reform primarily in Africa but also in other countries that have undertaken or are contemplating similar reforms This book is the second in a series of books about Secured Transactions Law in countries around the world and its reform both on a national and an international scale The first book Secured Transactions Law Reform Principles Policies and Practice was published in 2016 **The Big Business of Small Enterprises** World

Bank,2015-02-13 The World Bank Group promotes small and medium enterprise SME growth through both systemic and targeted interventions Targeting means focusing benefits on one size class of firms to the exclusion of others Targeted support for SMEs is a big business for the World Bank Group averaging around 3 billion a year in commitments expenditures and gross exposure over the 2006 12 period In the context of broader reforms such targeted support can be a powerful tool Targeting SMEs is not an end in itself but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity A thriving and growing SME sector is associated with rapidly growing economies A central challenge is to level the economic playing field by ensuring dynamic markets strengthening market support institutions and removing constraints to participation IEG found that financial sector development can have both a

pro growth and pro poor impact by alleviating SMEs financing constraints enabling new entry of firms and entrepreneurs and better resource allocation Layered on top of this are targeted forms of assistance these interventions may build on a foundation of more systemic reforms may come in tandem with them or may in fact be a means to build systemic reforms from the bottom up Any credible justification of targeted support to SMEs must be focused on establishing well functioning markets and institutions not simply providing a temporary supply of benefits to a small group of firms during a project s lifespan Thus targeted interventions need to leverage resources to produce broader benefits for institutions and markets To make targeted support for SMEs more effective the World Bank Group needs to do several things Clarify its approach to targeted support to SMEs Enhance the support s relevance and additionality Institute a tailored research agenda Strengthen guidance and quality control for such support Reform MIGA s Small Investment Program **Wall Street and the Financial**

Medium-Sized Enterprises in Europe Mr.Shekhar Aiyar,Mr.Ali J Al-Eyd,Ms.Bergljot B Barkbu,Andreas Jobst,2015-05-01 Small and medium sized enterprises SMEs account for a disproportionate share of output and employment in Europe but are still highly dependent on bank finance which dried up or became prohibitively expensive during the crisis Broader access to alternative long term finance through securitization would limit their exposure to banking sector difficulties and thus help

revive credit The SDN examines the various impediments to the development of a well functioning and liquid securitization market in Europe and proposes a comprehensive multi faceted strategy to support its development through regulatory reforms and infrastructure development together with targeted and time bound official sector support This would require i greater regulatory differentiation between securities of different quality and underlying asset structures ii harmonized national enforcement and insolvency frameworks and standardized reporting requirements and iii greater capacity of EU authorities to support new issuance These measures would be underpinned by a pan European definition of high quality securitization HQS comprising simple transparent and efficient asset structures receiving preferential regulatory treatment
