our time at such an angle as to reflect the most curious and profitable lights upon it To tell his story is to reflect upon all the main educational ideas of the last half century and to revise our conception of the process and purpose of the modern community in relation to education For Sanderson had a mind like an octopus it seemed always to have a tentacle free to reach out beyond what was already held and his tentacles grew and radiated farther and farther Before his end he had come to a vision of the school as a centre for the complete reorganisation of civilised life I knew him personally only during the last eight years of his life I met him for the first time in 1914 when I was proposing to send my sons to his school But our thoughts and interests drew us very close to one another I never missed an opportunity of meeting and talking to him and I was the last person he spoke to before his sudden death He was sixty six years of age when he died Those last eight years were certainly the richest and most productive of his whole career he grew most in those years he travelled farthest I think I saw all the best of him It is I think no disadvantage to have known him only in his boldest and most characteristic phase It saves me from confusion between his maturer and his earlier phases He was a much stratified man He had grown steadfastly all his life he had shaken off many habitual inhibitions and freed himself from once necessary restraints and limitations He would go discreetly while his convictions accumulated and then break forward very rapidly He had a way of leaving people behind and if I had fallen under his spell earlier I too might have been left far behind He was I recall a rock climber he was a mental rock climber also and though he was very wary of recalcitrance there were times when his pace became so urgent that even his staff and his own family were left tugging breathless and perplexed at the rope *Progressive Education*, 1924 Vol 31 33 1953 54 1956 one issue designated as yearbook number *Literature for Children* Orton Lowe, 2019-12-17 In *Literature for Children* Orton Lowe presents a comprehensive exploration of the role and significance of literature in the development of young minds Through a scholarly yet accessible prose Lowe interweaves critical analysis with charming anecdotes shedding light on both classic and contemporary children's literature He deftly examines themes of imagination moral development and social awareness situating these narratives within a broader cultural and historical context This work not only highlights the transformative potential of storytelling but also invites readers to appreciate the artistry behind children's literature making a case for its essential place in education and societal values Orton Lowe a distinguished literary scholar well versed in children's literature draws from his extensive academic background and personal experiences as an educator and a parent His keen insights are grounded in years of research and an enduring passion for fostering a love of reading among children This book is influenced by Lowe's belief that literature serves as a powerful tool for both personal and collective growth shaping the hearts and minds of future generations *Literature for Children* is an invaluable resource for educators parents and literary enthusiasts alike It not only deepens the reader's understanding of children's literature but also serves as a guide to nurturing a lifelong appreciation of reading I highly recommend this book for anyone interested in the cultural importance of stories in childhood development **New Worlds For Old: A Plain Account of Modern**
