the problem of unsolvability Sherlock Holmes manipulates data structures when solving a crime the magic in Harry Potter's
world is understood through types and abstraction and Indiana Jones demonstrates the complexity of searching Along the
way Erwig also discusses representations and different ways to organize data intractable problems language syntax and
ambiguity control structures loops and the halting problem different forms of recursion and rules for finding errors in
algorithms This engaging book explains computation accessibly and shows its relevance to daily life Something to think about
next time we execute the algorithm of getting up in the morning *Hansel and Gretel - And Other Siblings Forsaken in
