The Trial Process Bruce Dennis Sales, 2013-11-11 As noted in the Preface to Volume 1 in this series the goal of *Perspectives in Law and Psychology* is to provide a forum for books aimed at systematically interfacing the two disciplines Toward this end Volume 1 presented a collection of original writings focused on the criminal justice system that grew out of a conference held at the University of Nebraska at Lincoln Because that volume was based on conference proceedings however an attempt was not made to provide thorough coverage of all law psychology issues in the criminal justice system rather it highlighted a select few issues that were currently being investigated by some of the outstanding people in the field This volume differs substantially from the first in that it attempts to bring together those psycholegal scholars who are doing the major research on the trial process today and provides broad coverage of critical research on the trial Thus the chapters not only provide an extensive review of existing literature in this field but also present new contributions by these scholars

Human Organizations and Social Theory Murray J. Leaf, 2010-10-01 In the 1930s George Herbert Mead and other leading social scientists established the modern empirical analysis of social interaction and communication enabling theories of cognitive development language acquisition interaction government law and legal processes and the social construction of the self However they could not provide a comparably empirical analysis of human organization The theory in this book fills in the missing analysis of organizations and specifies more precisely the pragmatic analysis of communication with an adaptation of information theory to ordinary unmediated communications The study also provides the theoretical basis for understanding the success of pragmatically grounded public policies from the New Deal through the postwar reconstruction of Europe and Japan to the ongoing development of the European Union in contrast to the persistent failure of positivistic and Marxist policies and programs

The Social Life of Politics Sian Lazar, 2017-06-06 A rich ethnographic portrait of the internal dynamics of two public sector unions in Argentina Political and Legal Anthropology Review A central motor of Argentine historical and political development since the early twentieth

century unions have been the site of active citizenship in both political participation and the distribution of social economic political and cultural rights What brings activists to Argentine unions and what gives these unions their remarkable strength The Social Life of Politics examines the intimate personal and family dimensions of two political activist groups the Union of National Civil Servants UPCN and the Association of State Workers ATE These two unions represent distinct political orientations within Argentina s broad vibrant labor movement The UPCN identifies as predominantly Peronist disciplined and supportive of incumbent government while the ATE prides itself on its democratic horizontal approach and relative autonomy from the electoral process Sian Lazar examines how activists in both unions create themselves as particular kinds of militants and forms of political community The Social Life of Politics places the lived experience of political activism into historical relief and shows how ethics and family values deeply inform the process by which political actors are formed understood and joined together through collectivism

Democracy, social resources and political power in the European Union Niilo Kauppi, 2018-02-28 In this book Kauppi develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union s democratic deficit Kauppi conceptualises the European

Union as both an arena for political contention and a nascent political order In this evolving multi levelled European political field individuals and groups construct material and symbolic structures of political power grounded in a variety of social resources such as nationality culture and gender The author shows how the dominance of both executive political resources and domestic political cultures has prevented the development of European democracy Supranational executive networks have become more autonomous reinforcing the dominance of the resources they control At the same time national political cultures condition the political status of elected institutions such as the European parliament The book is particularly suited for undergraduate and graduate students in the fields of European Politics European Union Studies and International Relations
