The strategic implications of a nuclear-armed Iran , Reassessing the Implications of a Nuclear-Armed Iran
Judith S. Yaphe,2009-08 A 2005 update of The Strategic Implications of a Nuclear Armed Iran by Kori Schake and Judith Yaphe which had been issued in 2001 by the Institute for National Strategic Studies INSS Contents of this report Iran s Perspective National Rights and Nuclear Weapons Neighbors Negotiators and Non proliferators U S Policy Options Endnotes Appendix A Timeline of Iran s Path to Nuclear Weapons Appendix B Iran s Nuclear Program Status Risks and Prospects Appendix C Walking the Tightrope Israeli Options in Response to Iranian Nuclear Developments **Checking Iran's Nuclear Ambitions** Henry D. Sokolski,Patrick Clawson, Considering the latest Iranian nuclear developments one might question whether a study now on how best to restrain Tehran is simply one that s come too late To be sure estimates vary as to when Iran could build its first bomb Some believe Tehran could do it before the end of 2005 others think Iran would only be able to do so by the end of the decade In either case though the die seems cast If Iran wants it has all that it needs eventually to build a bomb on its own Certainly trying to deny Iran further nuclear technology in the hopes that this will prevent it from getting nuclear weapons is no longer a credible strategy The questions this edited volume addresses are whether or not any strategy can prevent Iran from going nuclear what the proper goals of such a strategy might be deterring use keeping Tehran from deploying weapons getting it to dismantle its nuclear program etc and what other nonproliferation goals ought to be attempted including trying to dissuade other nations from following Iran s example The answers this volume offers are 1 in the long run Iran will gain little from going nuclear and 2 much can be gained by enforcing the nonproliferation rules Iran agreed to and spelling out the costs to Iran of its continuing acquisition of nuclear weapons related capabilities Weapons Proliferation and War in the Greater Middle East Richard L. Russell,2007-05-07 This important new book explores the strategic reasons behind the proliferation of nuclear biological and chemical weapons as well as ballistic missile delivery systems in the Greater Middle East It examines the uses and limitations of chemical weapons in regional combat ballistic missile warfare and defenses as well as Iran s drive for nuclear weapons and the likely regional reactions should Tehran acquire a nuclear weapons inventory This book also discusses Chinese assistance to WMD and ballistic programs in the Greater Middle East Finally this book recommends policy options for American diplomacy to counter the challenges posed by WMD proliferation This essential study prepares the ground for the challenges facing the international community Richard Russell is a professor at the National Defense University s Near East South Asia Center for Strategic Studies in Washington DC He also teaches at the Security Studies Program at Georgetown University He previously served as a political military analyst at the CIA **Proliferation and Emerging Nuclear Order in the Twenty-first Century** N. S. Sisodia,V. Krishnappa,Priyanka Singh,2009 This book provides some important perspectives on the emerging nuclear order The contributors discuss most burning questions of the day What are the challenges to the global nuclear

regime What are the consequences of a nuclear Iran for West Asian peace and stability Will it give rise to a nuclear quest among the important West Asian states How would the West respond in such an eventuality What would be the response of major Asian powers to nuclear Iran What are the consequences of changes in the East Asian nuclear order for stability and peace in the region and beyond How would major regional players respond What are the implications of non state actors acquiring nuclear weapon technology and capabilities What did the international community learn from the discovery of the A Q Khan network What are the possibilities for international cooperation against nuclear proliferation *Countering the Proliferation of Weapons of Mass Destruction* Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Dokos presents an assessment of the Alliance's options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers **Iran's Nuclear Programme** Joachim

Krause, 2012-02-20 This book examines the strategic implications of Iran's nuclear programme providing an inventory of the negotiations and a discussion of possible solutions to this pressing international security issue The Islamic Republic of Iran's nuclear programme has been the cause of one of the most extended international crises of the past decade Multilateral institutions have been unable to resolve the issue which has the potential to derail the global nuclear non proliferation regime Recent failures of diplomatic offers for an extended Iran EU cooperation and projected US arms sales to Iran's neighbours suggest an imminent escalation of the issue which has been simmering since first reports about Iranian nuclear fuel enrichment activities emerged in 2002 Since then the topic has been the subject of intense media coverage as well as academic and diplomatic debate This volume brings together analysts and authors with diverse backgrounds including international diplomats formerly involved in negotiations with Iranian officials The various chapters bring together different perspectives and empirical analyses and include detailed assessments of both US and European efforts in diplomatic

relations with Iran as well as of the domestic politics in Iran itself This book will be of interest to students of Iranian politics Middle Eastern politics strategic studies nuclear proliferation international security foreign policy and IR in general

United States Relations with China and Iran Osamah F. Khalil, 2019-07-11 Bringing together experts from history international relations and the social sciences United States Relations with China and Iran examines the past present and future of U S foreign relations toward the People s Republic of China and the Islamic Republic of Iran It benefits from recently declassified documents and an interdisciplinary transnational approach to explore different aspects of the relations between these three countries While the 20th century has been referred to as the American Century this book posits that the 21st century will be shaped by relations between the United States and key countries in Asia in particular China and Iran In assessing the United States foreign policy towards China and Iran over the past six decades the chapters focus on several key themes interaction normalization and confrontation The book provides an insight into how and why Washington has developed and implemented its policies toward Beijing and Tehran and examines how China and Iran have developed policies toward the United States and internationally Finally it draws on the insights of leading scholars discussing the future of relations between Beijing and Tehran This interdisciplinary book brings a unique perspective to the international relations of the 20th century and beyond and will benefit students and scholars of U S foreign relations as well as Middle Eastern and East Asian history and politics

The Strategic Implications of a Nuclear-armed Iran Kori N. Schake, Judith Share Yaphe, 2001 This essay begins with the assumption that Iran is intent on acquiring nuclear weapons and the long range missile systems needed for their delivery It focuses on the approaches that policymakers have taken or could still take to avert or to slow this development and it examines the potential impact on national interests particularly on U S nonproliferation strategy when Iran becomes a nuclear weapons state The basic issue is how to manage a nuclear armed Iran As a policy analysis it intends to build intellectual capital about how to manage the problem of a nuclear armed Iran and to suggest courses of action that would minimize the negative impact on national interests

Strategic Challenges Stephen J. Flanagan, James A. Schear, 2008-02 Experts analyze seven key security challenges **Strategic Forum**, 1994 **United States Congressional Serial Set, Serial No. 14741, Senate Documents Nos. 15-17**, *Combating Proliferation* Jason D. Ellis, Geoffrey D. Kiefer, 2007-02-23 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community s flawed assessment of Iraq s weapons systems and the Bush administration s decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan s development of nuclear weapons North Korea s defiance of U N watchdogs Russia s transfer of nuclear and missile technology to Iran and China s to Pakistan the Soviet biological warfare

program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration s policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers

Dangerous But Not Omnipotent Frederic Wehrey, David E. Thaler, Nora Bensahel, Kim Cragin, Jerrold D. Green, 2009-04-16 In an analysis grounded in the observation that although Iranian power projection is marked by strengths it also has serious liabilities and limitations this report surveys the nature of both in four critical areas and offers a new U S policy paradigm that seeks to manage the challenges Iran presents through the exploitation of regional barriers to its power and sources of caution in the regime s strategic calculus

The Future of Extended Deterrence Stéfanie von Hlatky, Andreas Wenger, 2015-08-04 Are NATO s mutual security commitments strong enough today to deter all adversaries Is the nuclear umbrella as credible as it was during the Cold War Backed by the full range of US and allied military capabilities NATO s mutual defense treaty has been enormously successful but today s commitments are strained by military budget cuts and antinuclear sentiment The United States has also shifted its focus away from European security during the wars in Afghanistan and Iraq and more recently with the Asia rebalance Will a resurgent Russia change this The Future of Extended Deterrence brings together experts and scholars from the policy and academic worlds to provide a theoretically rich and detailed analysis of post Cold War nuclear weapons policy nuclear deterrence alliance commitments nonproliferation and missile defense in NATO but with implications far beyond The contributors analyze not only American policy and ideas but also the ways NATO members interpret their own continued political and strategic role in the alliance In depth and multifaceted The Future of Extended Deterrence is an essential resource for policy practitioners and scholars of nuclear deterrence arms control missile defense and the NATO alliance

US Foreign Policy and Iran Donette Murray, 2009-09-11 US Foreign Policy and Iran is a study of US foreign policy decision making in relation to Iran and its implications for Middle Eastern relations It offers a new assessment of US Iranian relations by exploring the rationale effectiveness and consequences of American policy towards Iran from the aftermath of the 1979 Iranian Revolution to the present day As a key country in a turbulent region and the recipient of some of the most inconsistent treatment meted out during or after the Cold War Iran has been both one of America s closest allies and an axis of evil or rogue state targeted by covert action and contained by sanctions diplomatic isolation and the threat of overt action Moreover since the attacks of 11 September 2001 Iran has played a significant role in the war on terror while also incurring American wrath for its links to international terror and its alleged pursuit of a nuclear weapons programme US Foreign

Policy and Iran will be of interest to students of US foreign policy Iran Middle Eastern Politics and international security in general Donette Murray is a Senior Lecturer in the Department of Defence and International Affairs at the Royal Military Academy Sandhurst She was awarded a PhD in International History by the University of Ulster in 1997 **Iran** Samir Tata, 2008-03-04 In order to further its own national interests the United States should strive to engage Iran in a dialogue that would lead to détente and a normalization of relations There are five major areas in which the national interests of the United States and Iran clearly converge stabilizing Iraq Afghanistan and Lebanon countering terrorism curbing drug trafficking particularly with respect to opium and heroin enhancing energy security by promoting the expansion of oil and gas production and ensuring the free flow of Arabian Gulf oil There are of course two critical areas where the perceived interests of the two countries diverge the resolution of the long running Israeli Palestinian dispute and the possible development of an Iranian nuclear weapons capability The five areas of converging interests involve pressing and urgent concerns that can and should be addressed in private bilateral talks For both the United States and Iran engagement can be mutually beneficial and not simply a zero sum game Among the greatest challenges to the vital national interests of the United States are fundamentalist terrorism bent on reviving an Islamic Caliphate and a rising China determined to displace America as Asia's preeminent power Confrontation with Iran would not only distract the United States from dealing with these challenges but also weaken it Engagement on the other hand holds the prospect of gaining Iranian cooperation in stabilizing Iraq and Afghanistan thereby facilitating an orderly exit from those countries It would also encourage Iranian cooperation in stabilizing Lebanon thereby avoiding a possible US entanglement in that country Engagement would help address the challenge of the growing global demand for energy both by developing Iran's oil and gas reserves and by encouraging the use of alternative energy sources such as nuclear power Engagement would also ensure the free flow of oil through the Arabian Gulf Finally with engagement even if the ultimate result is the emergence of a nuclear armed Iran the United States has the opportunity to influence the rise of Iran as a regional power just as it has with China and now increasingly with India In short engagement with Iran with the goal of normalization of relations and détente will further the vital national interests of the United States Deterring America Derek D. Smith, 2006-05-25 Faced with America's military superiority many countries are turning to weapons of mass destruction WMD as a means to deter United States intervention However the events of September 11 awakened America to a degree of vulnerability it had never experienced before making it increasingly unwilling to tolerate such weapons in the hands of unstable and unpredictable regimes Through theoretical historical and prescriptive lenses this book explores the modern security dilemma created by the twin fears of American encroachment and vulnerability which form a vicious cycle of insecurity that challenges traditional notions of deterrence Using Iraq and North Korea as case studies Smith argues that the United States may need to re-evaluate its foreign policy strategies against WMD proliferation giving renewed attention to defensive measures negotiated disarmament interdiction

and perhaps preemption Geopolitics Bert Chapman, 2011-04-07 This concise introduction to the growth and evolution of geopolitics as a discipline includes biographical information on its leading historical and contemporary practitioners and detailed analysis of its literature An important book on a topic that has been neglected for too long Geopolitics A Guide to the Issues will provide readers with an enhanced understanding of how geography influences personal national and international economics politics and security The work begins with the history of geopolitics from the late 19th century to the present then discusses the intellectual renaissance the discipline is experiencing today due to the prevalence of international security threats involving territorial airborne space based and waterborne possession and acquisition The book emphasizes current and emerging international geopolitical trends examining how the U S and other countries including Australia Brazil China India and Russia are integrating geopolitics into national security planning It profiles international geopolitical scholars and their work and it analyzes emerging academic military and governmental literature including gray literature and social networking technologies such as blogs and Twitter Gulf Military Forces in an Era of Asymmetric Wars Khalid Al-Rodhan, Anthony H. Cordesman, 2006-12-30 The significance of the Persian Gulf to international peace and security and to the global energy market cannot be overstated Events such as the attacks of September 11 and the rise in energy demand and prices have only highlighted the importance of stability in the Gulf to the health of the global economy This book demonstrates that the nature of military and political threats in the Gulf states Bahrain Saudi Arabia Iran Iraq Qatar Yemen and the UAE has shifted during the past three years Although the threat from Saddam Hussein s Iraq which produced three recent major conventional wars Iran Iraq 1980 88 Persian Gulf 1990 and Iraq 2003 has largely disappeared it has been replaced by concerns over the asymmetric warfare conducted by terrorist organizations and over the proliferation of WMDs by both states and terrorists These developments are affecting the defense planning and strategic posture of each country and this book analyzes developments in the force structures of the Gulf states and their ability to deal with this shift in the nature of the threat The military and security forces of the Gulf states must evolve to adapt to the changing nature of the threat and take into account the risk of the Iraqi insurgency and the uncertainty surrounding Iraq s future The key areas covered in this book include the internal terrorist threat to Saudi Arabia and the Gulf states the impact of Iran s nuclear program and the risk it poses to energy and internal security in the Gulf area and border disputes within the region that could develop into conflict In addition the book studies the impact of the Iraq War on regional security and the fear of the insurgency spilling over into neighboring states Cordesman and Al Rodhan demonstrate a shift toward using internal security services to deal with the threat of extremism and asymmetric warfare They also suggest that high energy prices and export revenues provide the Gulf countries the opportunity to upgrade their military forces and deal with their undercapitalization as a result of low oil prices in the 1990s Moreover they insist that the future of Iraq the strategic and nuclear posture of Iran and the terrorist threat will remain major risks and uncertainties in the short to medium run
