Strategic Defense Debate:

The Strategic Defense Debate Craig Snyder, 2016-11-11 The goal of our strategic defense research program the vision and hope of the President is to stop Soviet missiles before they could destroy any targets be they in the United States or anywhere else The goal is noble and straightforward to destroy weapons that kill people Thus based on a realistic view of Soviet military planning the transition to strategic defense would not be destabilizing In fact any initial defensive capabilities would offer many benefits This objective is far more idealistic moral and practical than the position taken by those who still embrace the mutual assured destruction MAD theory that defenses must be totally abandoned Caspar Weinberger This is basically a research program and should remain so at least for the foreseeable future In a world that relies on an exquisite strategic balance to forestall the holocaust it would be the worst of blunders to jolt the tightrope when the safety net is tied at only one end James Schlesinger Neither Star Wars I or Star Wars II in whatever form one considers them is an effective response to the public s intuitive awareness of the unacceptable risk posed by our present nuclear strategy Robert McNamara The goal of our innovative science and technology program is to establish scientific feasibility and engineering validation of revolutionary concepts concepts with potential for full SDI technological development This forward looking office has a broad research charter which focuses on advanced directed energy concepts such as gamma ray lasers on novel sensing and data preprocessing techniques on advanced materials for space applications on innovations in spacepower and on emerging space science applications and ultra high speed supercomputing Interest in such exotic areas of science and technology clearly illustrates that SDI has greatly facilitated the mobilization of our nation s scientific community Lt Gen James Abrahamson Prominent world leaders and scientists came together in 1985 to discuss the technological feasibility and the political sensibility of Star Wars Their essays presented in *The Strategic Defense Debate* provide for the first time a comprehensive look at this timely and controversial subject Craig Snyder s introduction and headnotes to the collection highlight the critical points of each essay as well as their conceptual significance to the overall topic Contributors include Caspar Weinberger James Schlesinger Lieutenant General James A Abrahamson Robert S McNamara Andrew Cockburn Richard Pipes Stephen F Cohen Adam Garfinkle Leon Wieseltier Michael Vlahos Franklin Long Francis Pym Major Simon P Worden Richard Garwin Robert S Cooper Colin S Gray Robert Bowman Alex Gliksman and Warren Zimmerman Excerpts from President Reagan s speech Peace and National Security and Ambassador Paul H Nitze s speech *On the Road to a More Stable Peace* are also included The essays were originally presented at a conference sponsored by The World Affairs Council of Philadelphia in late 1985 *The Strategic Defense Debate* will be invaluable to students scholars and lay persons interested in politics history military strategy and Soviet relations *Strategic Defense in the 21st Century* Hans Binnendijk, 1986

Perspectives On Strategic Defense Steven W Guerrier, Wayne C Thompson, Barry M Blechman, George Rathjens, 2019-05-28 Bringing together proponents and opponents of the Strategic Defense Initiative this book includes

original essays by leading experts on every aspect of the issue The collection provides a valuable introduction to the many complex questions involved in any serious consideration of the SDI The contributors explore such issues as the strategic impl

Moral Paradoxes of Nuclear Deterrence Gregory S. Kavka,1987-10-30 This volume examines the complex and vitally important ethical questions connected with the deployment of nuclear weapons and their use as a deterrent A number of the essays contained here have already established themselves as penetrating and significant contributions to the debate on nuclear ethics They have been revised to bring out their unity and coherence and are integrated with new essays The books exceptional rigor and clarity make it valuable whether the reader s concern with nuclear ethics is professional or personal Part I explores the morality of nuclear deterrence from each of the two dominant traditions in moral philosophy deontology and consequentialism and points out a number of interesting ethical dilemmas Part II criticizes a variety of alternatives to deterrence unilateral nuclear disarmament world government strategic defense against ballistic missiles and nuclear coercion and argues for mutual nuclear disarmament as a realistic and desirable long run alternative The Strategic Defense Initiative Ralph L. Dietl,2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical catastrophe of the first order the downfall of the Soviet Union The Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system
