Taking Sides In Social Research Partisanship And Bias In Social Enquiry:

Taking Sides in Social Research Martyn Hammersley, 2005-08-12 In the past it was generally taken for granted that the goal of social research was the production of objective knowledge and that this required a commitment to value neutrality. In more recent times however both these ideals have come to be challenged and it is often argued that all research is inevitably political in its assumptions and effects. In this major contribution to the debate Martyn Hammersley assesses the arguments from the classic and still influential contributions of C Wright Mills, Howard Becker and Alvin Gouldner to the present day. He concludes that the case for partisanship is not convincing and that an intelligent and sceptical commitment to the principles of objectivity and value neutrality must remain an essential feature of research.

Taking Sides in Social Research Martyn Hammersley, 1999 Ground Rules for Social Research Martyn Denscombe, 2009-08-16 Ground Rules for Social Research is a user friendly resource for people doing small scale social research projects. It focuses on the key ideas and practices that underlie good research and provides clear guidelines to newcomers and experienced researchers alike. The book is written for undergraduate, postgraduate and professional students in the social sciences, business studies, health studies, media studies and education who need to undertake research projects as part of their studies. Key features of the book include: The identification of 12 ground rules for good social research. Checklists to help researchers evaluate their approach and avoid fundamental errors. A clear and jargon free style. This new edition of the book builds on the features that made the first edition so successful, adding New chapters on research design and research philosophy. An increased focus on mixed methods research. More examples and illustrations. Updated material relating to the internet and online research.

Research in Practice for Forensic Professionals Kerry Sheldon, Jason Davies, Kevin Howells, 2012-03-12 This book explores applied research methods used in forensic settings: prisons, the probation service, courts and forensic mental health establishments, and provides a comprehensive how to guide for forensic practitioners and researchers. It provides practitioners and researchers with grounding in the practical techniques appropriate for research in applied forensic settings. This includes knowledge and skills of the research process and the wide range of research methods, both quantitative and qualitative, being applied in this arena. The text provides a critical understanding of the problems, challenges and ethical issues which can arise and ideas for managing these. Specific attention is paid to empirical research within forensic populations and settings, including researching vulnerable groups, e.g. offenders and the mentally ill in secure settings, evaluating treatment programmes and the uses and problems of randomised control trials. The book is clearly structured, with each methodology chapter describing the background of the approach, the type of research questions addressed, design principles and issues, the types of analysis that can be utilised, strengths and limitations of the method, future directions and further sources of information. Through the inclusion of case studies and illustrative examples from forensic researchers and practitioners who have extensive experience of conducting applied research, this book tackles real life problems typically

faced by researchers and practitioners Research in Practice for Forensic Professionals is an essential one stop resource for practitioners such as psychologists nursing and medical staff prison and probation workers social workers occupational therapists who have an interest in research and in evaluating their own work and the services in which they work It will also be of interest to students studying areas of applied research such as forensic psychology or applied criminology and those teaching them
