Bibliography of Medieval Military History and Technology Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense *Letters My Grandfather Wrote Me* Bryan Crawford, 2011-11-23 The Douglasses are traced from 100 A D with ancestral background in Ireland around 300 B C There is an American branch from the 18th century with connections to the U S war of independence and the anti slave movement The Crawfords are shown in their early history around the 12th century then since the early 19th Century in Scotland Ireland and New Zealand The Clarks are shown since the mid 19th century but with strong Huguenot roots in the 17th century The Gagens are traced from Germany to Norfolk in the U K in the 17th century and to Canada and America in the 19th where Dan Gagen married into the Chippewa tribe The book is about Cyril Gagen who settled in New Zealand with his mid wife mother in the early 20th century and is written by his grandson The last chapter is autobiographical with an in depth discussion on Social Control and the ethics of its use in modern Britain and New Zealand The Clarion review states that the book is anti monarchist which is totally incorrect
