The Hedgehog The Fox And The Magister's Pox:

The Hedgehog, the Fox, and the Magister's Pox Stephen Jay Gould, 2003 Draws on the philosophy of seventh century B C Greek soldier and poet Archilochus to challenge assumptions about an inescapable conflict between science and the humanities rebut ideas from Edward O Wilson's *Consilience* and explain why the pursuit of knowledge must always operate in tandem with nature Reprint 50 000 first printing *The Hedgehog, the Fox, and the Magister's Pox* Stephen Jay Gould, 2011-10 In his new book and his first full length original title since *Full House* in 1996 the eminent paleontologist Stephen Jay Gould offers a surprising and nuanced study of the complex relationship between our two great ways of knowing science and the humanities twin realms of knowledge that have been divided against each other for far too long In building his case Gould shows why the common assumption of an inescapable conflict between science and the humanities is false mounts a spirited rebuttal to the ideas that his intellectual rival E O Wilson set forth in his book *Consilience* and explains why the pursuit of knowledge must always operate upon the bedrock of nature's randomness *The Hedgehog the Fox and the Magister's Pox* is a controversial discourse rich with facts and observations gathered by one of the most erudite minds of our time

The Hedgehog, The Fox And The Magister's Pox Stephen Jay Gould, 2011-12-31 Completed shortly before his death this is the last work of science from the most celebrated popular science writer in the world In characteristic form Gould weaves the ideas of some of Western society's greatest thinkers from Bacon to Galileo to E O Wilson with the uncelebrated ideas of lesser known yet pivotal intellectuals He uses their ideas to undo an assumption born in the seventeenth century and continuing to this day that science and the humanities stand in opposition Gould uses the metaphor of the hedgehog who goes after one thing at a measured pace systematically investigating all the fox skilled at many things intuitive and fast and the magister's pox a censure from the Catholic Church involved in Galileo's downfall to illustrate the different ways of responding to knowledge in a scientific humanistic or fearful way He argues that in fact each would benefit by borrowing from the other

The Hedgehog, the Fox, and the Magister's Pox Steven James Gold, 2004 Stephen Jay Gould offers a surprising and nuanced study of the complex relationship between our two great ways of knowing science and the humanities twin realms of knowledge that have been divided against each other for far too long To establish his two protagonists Gould draws from a seventh century b c proverb attributed to the Greek soldier poet Archilochus that said roughly The fox devises many strategies the hedgehog knows one great and effective strategy While emphatically rejecting any simplistic attempt to assign either science or the humanities to one or the other of these approaches to knowledge Gould uses this ancient concept to demonstrate that neither strategy can work alone but that these seeming opposites can be conjoined into a common enterprise of tremendous unity and power In building his case Gould shows why the common assumption of an inescapable conflict between science and the humanities in which he includes religion is false mounts a spirited rebuttal to the ideas that his intellectual rival E O Wilson set forth in his book *Consilience* and explains why the

pursuit of knowledge must always operate upon the bedrock of nature's randomness The hedgehog the fox and the magister's pox is a controversial discourse rich with facts and observations gathered by one of the most erudite minds of our time

Understanding Complex Ecosystem Dynamics William S. Yackinous, 2015-06-03 Understanding Complex Ecosystem Dynamics A Systems and Engineering Perspective takes a fresh interdisciplinary perspective on complex system dynamics beginning with a discussion of relevant systems and engineering skills and practices including an explanation of the systems approach and its major elements From this perspective the author formulates an ecosystem dynamics functionality based framework to guide ecological investigations Next because complex system theory across many subject matter areas is crucial to the work of this book relevant network theory nonlinear dynamics theory cellular automata theory and roughness fractal theory is covered in some detail This material serves as an important resource as the book proceeds In the context of all of the foregoing discussion and investigation a view of the characteristics of ecological network dynamics is constructed This view in turn is the basis for the central hypothesis of the book i.e. ecological networks are ever changing networks with propagation dynamics that are punctuated local to global and perhaps most importantly fractal To analyze and fully test this hypothesis an innovative ecological network dynamics model is defined designed and developed The modeling approach which seeks to emulate features of real world ecological networks does not make a priori assumptions about ecological network dynamics but rather lets the dynamics develop as the model simulation runs Model analysis results corroborate the central hypothesis Additional important insights and principles are suggested by the model analysis results and by the other supporting investigations of this book and can serve as a basis for going forward complex system dynamics research not only for ecological systems but for complex systems in general Provides a fresh interdisciplinary perspective offers a broad integrated development and contains many new ideas Clearly explains the elements of the systems approach and applies them throughout the book Takes on the challenging and open issues of complex system network dynamics Develops and utilizes a new innovative ecosystem dynamics modeling approach Contains over 135 graphic illustrations to help the reader visualize and understand important concepts

Fogg, 2017-11-28 A riveting look at how dog and humans became best friends and the first history of dog domestication to include insights from indigenous peoples In this fascinating book Raymond Pierotti and Brandy Fogg change the narrative about how wolves became dogs and in turn humanity s best friend Rather than describe how people mastered and tamed an aggressive dangerous species the authors describe coevolution and mutualism Wolves particularly ones shunned by their packs most likely initiated the relationship with Paleolithic humans forming bonds built on mutually recognized skills and emotional capacity This interdisciplinary study draws on sources from evolutionary biology as well as tribal and indigenous histories to produce an intelligent insightful and often unexpected story of cooperative hunting wolves protecting camps and wolf human companionship This fascinating assessment is a must read for anyone interested in human evolution ecology animal behavior anthropology and the history of canine domestication **Common Knowledge** Moira Cockell, Jerome Billotte, Frederic Darbellay, Francis Waldvogel, 2011-02-01 Knowledge is a living thing sustained through dynamic reflexive processes Whether at the level of cellular signaling pathways Internet design or sociocultural interactions human understanding grows and accrues value through bi directional transmission across networks of emitters and receptors And the cross fertilization of ideas from differen **Animal Encounters** Susan Crane, 2012-11-29 Traces of the living animal run across the entire corpus of medieval writing and reveal how pervasively animals mattered in medieval

thought and practice In fascinating scenes of cross species encounters a raven offers St Cuthbert a lump of lard that waterproofs his visitors boots for a whole year a scholar finds inspiration for his studies in his cat s perfect focus on killing mice and a dispossessed knight wins back his heritage only to give it up again in order to save the life of his warhorse Readers have often taken such encounters to be merely figurative or fanciful but Susan Crane discovers that these scenes of interaction are firmly grounded in the intimate cohabitation with animals that characterized every medieval milieu from palace to village The animal encounters of medieval literature reveal their full meaning only when we recover the living animal s place within the written animal The grip of a certain humanism was strong in medieval Britain as it is today the humanism that conceives animals in diametrical opposition to humankind Yet medieval writing was far from univocal in this regard Latin and vernacular works abound in other ways of thinking about animals that invite the saint the scholar and the knight to explore how bodies and minds interpenetrate across species lines Crane brings these other ways of thinking to light in her readings of the beast fable the hunting treatise the saint s life the bestiary and other genres Her substantial contribution to the field of animal studies investigates how animals and people interact in culture making how conceiving the animal is integral to conceiving the human and how cross species encounters transform both their animal and their human participants

Natural Theology in the Scientific Revolution Katherine Calloway,2015-10-06 In the seventeenth century scientific discoveries called into question established Christian theology It has been claimed that contemporary thinkers contributed to this conflict model by using the discoveries of the natural world to prove the existence of God Calloway challenges this view by close examination of five key texts of the period

The Aesop's Fable Paradigm K. Brandon Barker,Daniel J. Povinelli,2021-12-07 The Aesop s Fable Paradigm is a collection of essays that explore the cutting edge intersection of Folklore and Science From moralizing fables to fantastic folktales humans have been telling

stories about animals animals who can talk feel think and make moral judgments just as we do for a very long time In contrast scientific studies of the mental lives of animals have professed to be investigating the nature of animal minds slowly cautiously objectively with no room for fanciful tales fables or myths But recently these folkloric and scientific traditions have merged in an unexpected and shocking way scientists have attempted to prove that at least some animal fables are actually true These interdisciplinary chapters examine how science has targeted the well known Aesop s fable The Crow and the Pitcher as their starting point They explore the ever growing set of experimental studies which purport to prove that crows possess an understanding of higher order concepts like weight mass and even Archimedes insight about the physics of water displacement The Aesop s Fable Paradigm explores how these scientific studies are doomed to accomplish little more than to mirror anthropomorphic representations of animals in human folklore and reveal that the problem of folkloric projection extends far beyond the Aesop s Fable Paradigm into every nook and cranny of research on animal cognition
