## **Social Experimentation:**

Social Experimentation Donald T. Campbell, M. Jean Russo, 1998-12-10 Social Experimentation offers a user friendly presentation of Donald Campbell's essential work in social experimentation. It includes exploration of the experimenting society, the compatibility of quantitative and qualitative methods, validity, seeking threats to the validity of social experiments, and how they can be controlled, the degree to which the social sciences can achieve scientific status, and the degree to which the operations, products, and consequences of science have a social impact. *Social Experimentation and Public Policymaking* David H. Greenberg, Donna Links, Marvin Mandell, 2003 Social experimentation randomly assigns individuals or groups to coverage by the policy of interest or a control group, and then the groups are compared in terms of outcome. Greenberg, economics, U of Maryland; Links, mathematics/science and engineering, Community College of Baltimore County; and Mandell, policy sciences, U of Maryland, seek to assess whether the substantial investment in social experimentation in the United States has resulted in significant public policy changes. After explaining the general concepts behind social experimentation, they analyze five case studies and determine that they are not of decisive importance in state policy making, but they often serve useful purposes of policy formation. **Validity and Social Experimentation** Leonard Bickman, 2000-01-21 Annotation: Leading social research methodologists and evaluators address the issues of validity, research design, and social experimentation in this first of two volumes inspired by the work of Donald Campbell and sponsored by the American Evaluation Association. The first part of the book focuses on three types of validity: external, construct, and statistical. Much attention is given to meta-analysis, statistical testing, and effect sizes. The second part is a major critique of Campbell's vision and practice of social experimentation. Contributors review and extend Campbell's ideas, concentrating on their relevance to evaluation and social intervention, and seeking to define an experimenting society. *The Digest of Social Experiments* David H. Greenberg, Mark Shroder, 2004 Contains brief summaries of 240 known completed social experiments. Each summary outlines the cost and time frame of the demonstration, the treatments tested, outcomes of interest, sample sizes, and target population, research components, major findings, important methodological limitations, and design issues encountered, and other relevant topics. In addition, very brief outlines of 21 experiments and one quasi-experiment still in progress as of April 2003 are also provided. p 3

Social Experimentation, Program Evaluation, and Public Policy Maureen A. Conrath,2012-12-06 This book contains the proceedings of the first international symposium devoted to research on the evaluation and planning of new person to person telecommunication systems It was sponsored by NATO s Special Programme Panel on Systems Science and took place in September 1977 at the University of Bergamo in the north of Italy Telecommunication systems which provide for communication between people rather than computers or other

instruments are of two kinds There are mass communication systems broadcast radio and television and interpersonal systems for example the telephone and Telex which join together individuals or small groups Here we have included in the interpersonal category certain systems for retrieving information from computers essentially those systems in which the role of the computer is primarily to act as a store and to identify that information which best fits a user's request This excludes management information systems in which the computer performs important transformation functions Distinctions between interpersonal and mass communication systems and between these two and data communication systems are increasingly breaking down for those who provide the services In the U K broadcasters are piloting information retrieval services and the British Post Office is competing with a more sophisticated system which could also be used for the exchange of messages Elsewhere computer data networks are increasingly employed for the exchange of personal messages

**Experiments in Practice** Astrid Schwarz, 2015-10-06 Traditionally experimentation has been understood as an activity performed within the laboratory but in the twenty first century this view is being challenged Schwarz uses ecological and environmental case studies to show how scientific experiments can transcend the laboratory

*Field Experiments in Political Science and Public Policy* Peter John, 2017-01-06 Field

experiments randomized controlled trials have become ever more popular in political science as well as in other disciplines such as economics social policy and development Policy makers have also increasingly used randomization to evaluate public policies designing trials of tax reminders welfare policies and international aid programs to name just a few of the interventions tested in this way Field experiments have become successful because they assess causal claims in ways that other methods of evaluation find hard to emulate Social scientists and evaluators have rediscovered how to design and analyze field experiments but they have paid much less attention to the challenges of organizing and managing them Field experiments pose unique challenges and opportunities for the researcher and evaluator which come from working in the field The research experience can be challenging and at times hard to predict This book aims to help researchers and evaluators plan and manage their field experiments so they can avoid common pitfalls It is also intended to open up discussion about the context and backdrop to trials so that these practical aspects of field experiments are better understood The book sets out ten steps researchers can use to plan their field experiments then nine threats to watch out for when they implement them There are cases studies of voting and political participation elites welfare and employment nudging citizens and developing countries
