Social Impact Assessment Method And Experience In Europe North America And The Developing World:

Social Impact Assessment Becker, Henk, Henk Becker University of Utrecht, Netherlands., 2014-01-02 This book is intended for introductory courses in SIA within sociology social policy human geography and political science at postgraduate level Specialist postgraduate and professional courses in policy orientated social research and in social and general impact assessment Social Impact Assessment H. A. Becker, 1997 Based on the author's own experience of impact assessment as a component of policy oriented research this book provides a practical introduction to the methodology of social impact assessment The coverage is comprehensive well balanced and up to date with a systematic approach to the effective use of techniques designed to sharpen public policy formulation The book features case study and exercise material and also incorporates useful summaries at the end of each chapter making it ideal for teaching purposes Social impact assessment will also be an invaluable professional resource for social and environmental scientists for policy makers and consultants and for those running management seminars on strategic learning scenario planning and action research It is also intended as a textbook for upper level undergraduate and postgraduate students of social and environmental science management and policy studies *Social Impact Assessment* Henk A. Becker, 1997 *The International Handbook of Social Impact Assessment* H. A. Becker, Frank Vanclay, 2003-01-01 This book provides a valuable addition to the Social Impact Assessment SIA literature While the volume addresses several good examples of how to case studies it also firmly addresses the importance of the need for firm conceptual and theoretical guidelines for SIA practice the volume is an excellent contribution to the SIA literature and I highly recommend it to both practitioner and researcher alike Geoff Syme Australasian Journal of Environmental Management An innovative collection which takes social impact assessment to the frontiers of environmental and social policy and citizen awareness Unusually this collection includes both sophisticated quantitative tools and equally important chapters on participation stakeholder involvement and environmental mediation A most valuable source book Michael Redclift King's College London UK Social Impact Assessment SIA is the process of analysing and managing the intended and unintended consequences on the human environment of planned interventions policies programmes plans projects so as to bring about a more sustainable and equitable biophysical and human environment This important Handbook presents an indispensable overview of the range of new methods and of the conceptual advances in SIA Recent increased attention to social considerations has led to substantial development in the techniques useful to and the thinking in SIA A distinguished group of contributors provides an up to date and comprehensive account of the cutting edge in SIA development This Handbook outlines a new understanding and definition of SIA and as such will be an invaluable reference tool for both practitioners and scholars at different levels working in the fields of SIA and environmental studies including both impact assessment and management **Measuring Organised Crime in Europe** Tom Beken, 2004 Recent years have been characterised by growing awareness among European member states

about serious shortcomings to the way organised crime is measured and assessed. Currently organised crime reports primarily generate descriptive analyses of a past situation based on law enforcement data and do not always provide the necessary information for proactive and preventive policy strategies. Therefore an EU Action Plan has been issued to develop a more future oriented and risk based methodology for the measurement of organised crime and to convert the traditional organised crime situation reports into strategic reports for planning purposes. This book is the outcome of two studies undertaken by a team composed of Belgian Italian and Swedish researchers for the European Commission. It presents an overview of current practices in the measurement of organised crime in Europe and includes a discussion about the concept and the assessment of the impact of the phenomenon. Further the feasibility of the implementation of the existing EU Action Plan was studied and evaluated. As a result of applied research *Measuring Organised Crime in Europe* provides an in depth and comparative analysis of current practice in drafting organised crime reports across and by the EU and offers new ideas to improve their quality. *Handbook of Regulatory Impact Assessment* Claire A. Dunlop, Claudio M. Radaelli, 2016-04-29. Regulatory impact assessment RIA is the main instrument used by governments and regulators to appraise the likely effects of their policy proposals. This pioneering Handbook provides a comparative and comprehensive account of this tool situating it in the relevant theoretical traditions and scrutinizing its use across countries policy sectors and policy instruments. Comprising six parts university researchers international consultants and practitioners working in international organizations examine regulatory impact assessment from many perspectives which include research traditions in the social sciences implementation regulatory indicators and effects tools and dimensions such as courts and gender sectoral case studies including environment enterprise and international development international diffusion in the European Union EU Americas Asia and developing countries appraisal training and education. With its wealth of detail and lessons to be learned the Handbook of Regulatory Impact Assessment will undoubtedly be of great value to practitioners and scholars working in governance political science and socio legal studies. ***New Directions in Social Impact Assessment*** Frank Vanclay, Ana Maria Esteves, 2011-01-01. This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis. Jon Samuel Head of Social Performance Anglo American. The list of authors reads like a who's who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics. Martin Haefele Manager Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board Yellowknife Northwest Territories Canada. This book gives a very broad overview of where Social Impact Assessment is coming from where it is now and where it could go from an impact assessment tool to an impact management tool. It provides a realistic insight in both the achievements and the struggles of Social Impact Assessment. A recommended read for both those interested in Social Impact Assessment and those in related

domains where social issues are gaining increasing importance such as Environmental Assessment and Sustainability Appraisal Rob Verheem Deputy Director Netherlands Commission for Environmental Assessment This important new book outlines current developments in thinking in the field of Social Impact Assessment SIA It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken The book emphasizes that much more than the act of predicting impacts in a regulatory context SIA needs to be the process of managing the social aspects of development and that there needs to be a holistic and integrated approach to impact assessment It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced This significant addition to the literature will be an invaluable reference for academics consultants and practitioners

Environmental Management for Sustainable Development Chris Barrow, 2006-09-27 Environmental management is a wide expanding and rapidly evolving field affecting everyone from individual citizens to businesses governments to international agencies Indisputably it plays a crucial role in the quest for sustainable development This comprehensively updated second edition explores the nature and role of environmental management covering key principles practices tools strategies and policies offers a thorough yet understandable introduction and points to further in depth coverage Among the key themes covered are sustainable development proactive approaches the precautionary principle the polluter pays principle the need for humans to be less vulnerable and more adaptable Reflecting the expansion and evolution of the field this revised edition focuses strongly on sustainable development There has been extensive restructuring to ensure the book is accessible to those unfamiliar with environmental management and it now includes greater coverage of topics including key resources under stress environmental management tools climate change and urban environmental management With rapid expansion and development of the subject it is easy for those embarking on a course of study to become disorientated but with its well structured coverage effective illustrations and foundation for further more focused interest this book is easily accessible to all

Society Building Xiangqun Chang, 2014-04-23 In China s future social development there is likely to be an interest in society building with interactions between top down and bottom up approaches along with a deepened level of social reform and the construction of a harmonious or symbiotic society This represents one of China s social development models and is reflected in the Communist Party of China CPC and state policy The term society building was proposed by Chinese thinkers nearly one century ago and has been used by Chinese sociologists to study Chinese society since the 1930s In the 21st century society building has been approached as an interdisciplinary concept by Chinese social scientists The main concern of China for its future social development is to enhance its people s wellbeing and encourage them to build Chinese society in innovative and creative ways This volume showcases the latest research of non Chinese scholars relating to this indigenous concept and to China s social development in the global context It tackles the following topics the assessment of the social impact of infrastructure projects China s

reforms and its changing political system whether or not the Singapore model is suitable for China to follow soft power through education and boundaries cosmopolitanisms and spaces in Chinese and international cities The book will be of interest to academics professionals practitioners university students and the general public seeking a comprehensive understanding of China Mining and Sustainable Development Sumit. K. Lodhia, 2018-01-12 Mining is a transformative activity which has numerous economic social and environmental impacts These impacts can be both positive and adverse enhancing as well as disrupting economies ecosystems and communities The extractive industries have been criticised heavily for their adverse impacts and involvement in significant social and environmental scandals More recently these industries have sought to respond to negative perceptions and have embraced the core principles of sustainability This sector could be regarded as a leader in sustainability initiatives evident from the various developments and frameworks in mining and sustainability that have emerged over time This book reviews current topical issues in mining and sustainable development It addresses the changing role of minerals in society the social acceptance of mining due diligence in the mining industry critical and contemporary debates such as mining and indigenous peoples and transit worker accommodation corporate sustainability matters such as sustainability reporting and taxation and sustainability solutions through an emphasis on renewable energy and shared used infrastructure Written by experts from Australia Europe and North America but including examples from both developed and developing countries the chapters provide a contemporary understanding of sustainability opportunities and challenges in the mining industry The book will be of interest to practitioners government and civil society as well as scholars and students with interests in mining and sustainable development **Opportunities and Challenges for the Greater Mekong Subregion** Charles Samuel Johnston, Xin Chen, 2020-01-29 The Mekong River is a vital and valuable resource with huge development potential for the six states through which it flows Given the significant asymmetry of power between those states however there is a real risk that some might utilise it to the detriment of others Without a sense of regional belonging it is difficult to imagine that these states and their constituent communities will take regional imperatives to heart participate in joint regulatory frameworks or adopt behaviours for upstream downstream and lateral cooperation over the appropriation and use of their shared resources How effectively has closer interdependence of the Mekong countries accommodated the development of a political social cultural space conducive to the growth of a regional we ness among not only political elites but also the general public The contributors to this volume approach this question from a range of directions including the impacts of tourism regional development programmes the Mekong Power Grid and Sino US rivalry This edited volume presents valuable insights for scholars of international relations Asian studies development studies environment studies policy studies and human geography *Assessing the Environmental Impacts of Hydropower Projects* Robert Zwahlen, 2022-01-03 This book describes the entire process of environmental impact assessment for hydropower and dam projects not from a legal or regulatory point of view but from a very applied one based mainly on

the personal experience of the author who is involved in this field of work since over 40 years by describing the different steps of such an assessment covering all major aspects to be dealt with The focus is on environmental issues while the other main subject social impacts is mentioned here only briefly It will be of interest not only for ESIA Environmental and Social Impact Assessment practitioners be they consultants involved in the preparation of such studies or staff members of environmental protection agencies having to come to decisions based on them but also for engineers and planners involved in such projects developers and people interested in questions related to energy environment and climate change Overall this book aims at contributing to put the discussion about hydropower and dam projects on a more objective level

Displacement, Impoverishment and Exclusion Sujit Kumar Mishra,R Siva Prasad,2020-11-02 This book is all about the nexus of state development intervention and the development community where the main objective of the development intervention is to enhance the revenue of the State s economy The institutional parameters are instrumental in this success However these mechanisms are limited to few stages of development giving very little space to the development communities This book is intended to present the contemporary research outcomes on the cross cutting theme of development induced displacement Please note This title is co published with Aakar Books New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh Maldives and Sri Lanka **Marine Fisheries Review** ,2005
