It thoroughly examines how social psychological research and intervention has contributed to the understanding of key topics in exercise and sport behaviour including: The social psychology of exercise and health, Social cognitive theories of exercise behaviour, Exercise and the physical self, Eating disorders in exercise and sport, Emotion and mood in athletes, Social psychology and motivation in sport, Group processes in sport, Aggression and crowd violence. The *Social Psychology of Exercise and Sport* is key reading for undergraduate and postgraduate students on social or sport psychology courses and on health related or sports science courses. The authors combine innovative research with practical examples and case studies, masterfully explaining the theory and applying it to real life problems. From coaching world class athletes to running exercise referral schemes, this book offers unrivalled advice and guidance. *The Social Psychology of Sport and Exercise* analyses contemporary research from both sport and exercise psychology, investigates the issues and challenges that practitioners face in settings ranging from the World Cup to the leisure centre.
