The Social Sciences and Their Interrelations William Fielding Ogburn, Alexander Goldenweiser, 1930 Interdisciplinary Relationships in the Social Sciences Muzafer Sherif, 2017-07-05 Interdisciplinary collaboration in the social sciences is obviously essential to scientific progress but discontent and practical difficulties hinder collaboration in research and training Many of the problems arise from the failure in the separate disciplines to understand the basis on which collaboration is necessary and possible In an effort to shed light on the situation these original essays by eminent scholars economists geographers psychologists political scientists sociologists anthropologists and others demonstrate effective means of achieving interdisciplinary coordination in studying human behavior and delineating promising areas for cooperative research The book provides a sophisticated guide to the nature of knowledge in social science as applied to its core disciplines **Introduction to the Social Sciences (RLE Social Theory)** Maurice Duverger, 2020-09-10 Professor Duverger at last provides the student with an overall view of the methodology of the social sciences He briefly traces the origin of the notion of a social science showing how it emerged from social philosophy Its essential elements and pre conditions are described the splintering of social science into specialist disciplines is explained and the need for a general sociology confirmed The techniques of observation used by social scientists are dealt with in some detail and the unity of the social sciences is illustrated by examples of the universal application of these techniques Documentary evidence in its various forms are described along with the basic analytical techniques including quantitative methods and content analysis Other methods of gathering information through polls interviews attitude scales and participant observation are all described Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered Arguing that observing and theorizing are not two different stages or levels of research he examines the practical value and difficulties of general sociological theories partial theories and models and working hypotheses He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences He then gives elementary instructions for using and assessing the value of mathematical techniques The possibilities of presenting social phenomena through graphs and charts are also explored There are useful book lists and diagrams **International Relations in Psychiatry** Volker Roelcke, Paul Weindling, Louise Westwood, 2010 The decades around 1900 were crucial in the evolution of modern medical and social sciences and in the formation of various national health services systems The modern fields of psychiatry and mental health care are located at the intersection of these spheres There emerged concepts practices and institutions that marked responses to challenges posed by urbanization industrialization and the formation of the nation state These psychiatric responses were locally distinctive and yet at the same time established influential models with an international

impact In spite of rising nationalism in Europe the intellectual institutional and material resources that emerged in the various local and national contexts were rapidly observed to have had an impact beyond any national boundaries In numerous ways innovations were adopted and refashioned for the needs and purposes of new national and local systems

International Relations in Psychiatry Britain Germany and the United States to World War II brings together hitherto separate approaches from the social political and cultural history of medicine and health care and argues that modern psychiatry developed in a constant though not always continuous transfer of ideas perceptions and experts across national borders Contributors John C Burnham Eric J Engstrom Rhodri Hayward Mark Jackson Pamela Michael Hans Pols Volker Roelcke Heinz Peter Schmiedebach Mathew Thomson Paul J Weindling Louise Westwood Volker Roelcke is professor and director at the Institute for the History of Medicine Giessen University Germany Paul J Weindling is professor in the history of medicine Oxford Brookes University UK Louise Westwood is honorary research reader University of Sussex UK
