Social Skills and Mental Health (Psychology Revivals) Peter Trower, Bridget Bryant, Michael Argyle, 2013-12-16 In the 10 years or so prior to original publication in 1978 new theories and discoveries in the social sciences had given a scientific basis and new impetus to the development of social skills training as a form of therapy This book explores the progress made with this idea and gives practical guidance for therapists based on several years experience with the technique The book provides an account of the latest ideas at the time about the analysis of social behaviour non verbal communication social skill rules analysis of situations etc The different techniques for training and modifying social behaviour some old some very new are described and compared with detailed accounts There is a careful critical review of follow up studies of social skills training and other forms of social therapy on in patients out patients and volunteer subjects The second part of the book consists of a manual for assessing deficits and difficulties and for training in ten main areas of social deficiency such as observation listening speaking asserting and planning A rating scale questionnaire and user s booklet of training exercises is included The book should be of interest not only to psychiatric professionals psychiatrists clinical psychologists psychiatric nurses occupational therapists but to many others such as social and community workers teachers prison officers and lay people who may be interested in forming self help groups either on their own or with professional guidance

Social Skills Training and Psychiatric Nursing Owen Hargie, Patrick J. McCartan, 2025-09-17 When it was originally published in 1986 this book was one of the few to be written on social skills and

mental health specifically for nurses Yet it is nurses who are uniquely placed to improve the skills of those with mental illness since it is they who often have most contact with patients or clients This book examines the place of social skills training in the practice of psychiatric nursing It provides relevant background to the evidence for limited social skills in psychiatric patients and the expanding role of the nurse and considers more practical elements such as selection and assessment of patients for a programme goal setting role play feedback and group versus individual approaches The book also analyses relevant skills themselves such as nonverbal communication and being assertive The book is aimed at both trained and student psychiatric nurses Social Skills for Mental Health Robert P. Sprafkin, N. Jane Gershaw, Arnold P. Goldstein, 1993 This practical guidebook is designed to help practitioners use proven techniques of structured learning to teach essential social skills that will help their clients function more effectively and independently at home at work and in group settings 27 specific topics are covered in detail and a transcript of an actual meeting is included Social Skills Training for Psychiatric Patients Robert Paul Liberman, William J. DeRisi, Kim Tornvall Mueser, 1989 This work is truly a guidebook succinct concrete clearly written and unambiguously specific Based upon learning principles the text naturally presents a linear and hierarchical exposition The reader is never in doubt about what steps should follow what step Each topic is broken down into readily assimilable components *Teaching Social Skills to Youth with Mental Health Disorders* Jennifer Resetar Volz, Tara Snyder, Michael Sterba, 2009 Research and experience show that children and adolescents who struggle with emotional behavioral and social problems do improve when they learn prosocial skills Social skill instruction therefore can be a vital component in the treatment planning for a child diagnosed with a mental health disorder Teaching Social Skills to Youth with Mental Health Disorders is a guide for therapists counselors psychologists educators and other practitioners trying to help these youth get better *Radical Approaches to Social Skills Training* Peter Trower, 2013-12-16 Originally published in 1984 one of the few facts that emerged clearly in the beleaguered field of psychology and mental health at the time was the extent of poor social skills in psychiatric patients the mentally handicapped and problem adolescents As a result during the 1970s social skills training espoused as a form of behaviour therapy seemed to offer great promise based on the notion that social skills like any other skills are learnt and can be taught if lacking However in evaluating social skills training many investigators found that skills did not endure and generalise This book attempts a major re assessment of social skills training It examines the underlying paradigms which are shown to be fundamentally behaviourist Such paradigms it is argued severely constrain the aims and method of current types of training Thus the book develops what is termed an agency approach based on man as a social agent who actively constructs his own experiences and generates his own goal directed behaviour on the basis of those constructs This new model is developed in both theoretical and practical ways in the main body of the book and should even today be of great interest to all those involved with social skills training Understanding and Treating Violent Psychiatric Patients Martha L. Crowner, 2008-11-01 One of the major challenges for mental health

professionals today is to successfully treat violent patients The mental health professional is obligated to go beyond containment and control to provide understanding complete assessment and accurate diagnosis and humane and effective treatment Understanding and Treating Violent Psychiatric Patients is a one of a kind comprehensive guide to assessment management understanding and treatment of violent patients The first section encompasses practical guides to treatment for both children and adults It discusses commonly encountered problems in the treatment of violent adult inpatients and includes a brief guide to pharmacological treatments A chapter is devoted to the treatment of abnormal aggression in children and adolescents The second section delves into a more conceptual and broadly focused approach to understanding violent patients It covers the relationship between dissociation and violence as well as the relationship between psychiatric disorders and violence and addresses impulse control and the treatment of impulsive patients Heavily researched and clinically focused this new title is a must read for psychiatrists psychologists psychiatric social workers psychiatric nurses or any mental health professional needing a better approach to understanding and treating violent patients *Social Skills Training for Psychiatric* Robert Paul Liberman, William J. Derisi, Kim T. Mueser, 1989-01 Clinical Handbook of Schizophrenia Kim T. Mueser, Dilip V. Jeste, 2008-03-27 Reviewing the breadth of current knowledge on schizophrenia this handbook provides clear practical guidelines for effective assessment and treatment in diverse contexts Leading authorities have contributed 61 concise chapters on all aspects of the disorder and its clinical management In lieu of exhaustive literature reviews each chapter summarizes the state of the science highlights key points the busy practitioner needs to know and lists recommended resources including seminal research studies invaluable clinical tools and more Comprehensive authoritative and timely the volume will enable professionals in any setting to better understand and help their patients or clients with severe mental illness **Psychiatric Nursing Skills** Graham Dexter, Michael Wash, 2013-12-01 In this book we have attempted to identify skills which are needed by the psychiatric nurse and in doing so to identify a body of knowledge unique to the professional psychiatric nurse The book has been written to demonstrate the basis of a skills approach for both the experienced and the inexperienced nurse to build upon for we believe that psychiatric nurses due to both their training and their particular mixture of interests are well equipped to be in the forefront of psychiatry as a developing art and science We hope that this book in some small way helps this development Some of the more recent advances in psychiatric nursing have been reinforced by the publication of a training syllabus for mental nurses English and Welsh National Boards 1982 This document highlights the need for a change from a medical model to a social model and from a task oriented learning experience to a skills approach We have attempted to reflect this change in emphasis by including such aspects as personal development and self awareness human sexuality the nursing process and counselling skills Social Skills and Mental Health Peter Trower, Bridget Bryant, Michael Argyle, 1978 In the 10 years or so prior to original publication in 1978 new theories and discoveries in the social sciences had given a scientific basis and new impetus to the development of social skills

training as a form of therapy This book explores the progress made with this idea and gives practical guidance for therapists based on several years experience with the technique The book provides an account of the latest ideas at the time about the analysis of social behaviour non verbal communication social skill rules analysis of situations etc The different techniques for training and modifying social behaviour some old some very new are described and compared with detailed accounts There is a careful critical review of follow up studies of social skills training and other forms of social therapy on in patients out patients and volunteer subjects The second part of the book consists of a manual for assessing deficits and difficulties and for training in ten main areas of social deficiency such as observation listening speaking asserting and planning A rating scale questionnaire and user s booklet of training exercises is included The book should be of interest not only to psychiatric professionals psychiatrists clinical psychologists psychiatric nurses occupational therapists but to many others such as social and community workers teachers prison officers and lay people who may be interested in forming self help groups either on their own or with professional guidance
