New Social Studies People Projects and Perspectives is not an attempt to be the comprehensive book on the era Given the  
sheer number of projects that task would be impossible However the current lack of knowledge about the politics people and

projects of the NSS is unfortunate as it often appears that new scholars are reinventing the wheel due to their lack of knowledge about the history of the social studies field. The goal of this book then is to sample the projects and individuals involved with the New Social Studies NSS in an attempt to provide an understanding of what came before and to suggest guidance to those concerned with social studies reform in the future especially in light of the standardization of curriculum and assessment currently underway in many states. The authors who contributed to this project were recruited with several goals in mind including a broad range of ages interests and experiences with the NSS from participants during the NSS era through new young scholars who had never heard much about the NSS. As many of the authors remind us in their chapters much has been written of the failure of the NSS. However in every chapter of this book the authors also point out the remnants of the projects that remain.
